Dear Sir,

Proposal: Removal of existing underground fuel tanks, and installation of new underground fuel tanks, repositioning of vent stack and rerouting of associated underground pipe work. New forecourt pavings where disturbed.
Site: Shell Fontwell, Arundel Road, Fontwell, West Sussex BN18 0SB.
WA/92/11/

Thank you for your letter of 18/11/2011.

The application proposes a development that may produce a trade effluent. No trade effluent can be discharged either directly or indirectly to any public sewer without the formal consent of Southern Water. The applicant is advised to discuss the matter further with Southern Water's Trade Effluent Inspectors. Please see <https://www.southernwater.co.uk/BusinessCustomers/wasteServices/tradeEffluent/> for further information.

Southern Water requires a formal application for a connection to the public sewer to be made by the applicant or developer.

We request that should this application receive planning approval, the following informative is attached to the consent:

"A formal application for connection to the public sewerage system is required in order to service this development, please contact *Atkins Ltd, Anglo St James House, 39A Southgate Street, Winchester, SO23 9EH* (tel 01962 858688), or www.southernwater.co.uk"

Southern Waters current sewerage records do not show any public sewers to be crossing the above site. However, due to changes in legislation that came in to force on 1st October 2011 regarding the future ownership of sewers it is possible that a sewer now deemed to be public could be crossing the above property. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and potential means of access before any further works commence on site.
