Hi Laura and Yuved,

Please see the email below which sets out the consultation response from Environmental Health to **WA/95/18/RES** – Land East of Tye Lane, Walberton.

I look forward to receiving your response.

Kind regards,

Michael

Dear Michael,

Environmental Health would request that the following conditions be placed on any permission given:

1. No floodlights or other forms of external lighting shall be installed or used at the tennis courts.
2. The tennis courts shall only be used between the hours of 07.00 and dusk daily.

With regard to the golf course to the north, we have concerns that there may be a (literal) impact from escaping golf balls on the future residents of this application. We would therefore request that the applicant liaise with the Golf Course to determine where Ball-Stop Fences (or other suitable mitigation) should be implemented to prevent ingress of golf balls onto the application site. Given that there are a number of trees on the northern boundary of the site and that direction of play will obviously be important, it is expected that the location and extent of Ball-Stop Fences will not be extensive. Environmental Health would then request the following condition:

3. Ball-Stop Fences (or other suitable mitigation) shall be placed along the northern boundary of the site where appropriate. The ball-stop fences shall be maintained in good condition thereafter.

Regards

Fiona
