Comment from Greenspace

Further to submission of Hard Landscape proposals and Public Open Space landscape proposals CSA/2823/107-110 drawings and Soft landscape proposals CSA/3823 101-103 I can confirm that the information supplied proposes an appropriate scheme in sufficient detail in plan and list form proposing a scheme which contains a good species mix in evergreen and deciduous mix and specified at a height and planting density which will provide instant impact and softening to the development whilst enhancing the biodiversity offer allowing for the creation of habitat formation.

The inclusion of community orchard within the proposals is a unique feature which has the potential in time to become a valuable community asset.

This cohesive landscape scheme will allow for the greening of the development and link the POS areas throughout and beyond. A robust maintenance regime will need to be implemented to ensure establishment and that these proposals achieve the vision.

The detail has also now included consideration of the ball stop netting adjacent to the golf course, which whilst would not disguise this, will go somewhere over time to softening the impact of this. There has been the inclusion of mature tree planting in this location which has a greater opportunity as it establishes to detract the eye, whilst allowing important views through to the golf course beyond.

From the information submitted, I would recommend the discharge of Condition 11 Landscaping reserved by condition imposed under planning approval WA/44/17/OUT on this application WA/96/19/DOC.
