Reference: **PP-15255140**

Dear Sir/Madam,

Site: Land West Of Yapton Lane, Walberton

**Re: Discharge of Condition on outline application granted at appeal
APP/C3810/W/22/3309365 for Condition 5, 26, 27 and 28.**

This application is on behalf of Doswell Projects Limited for the discharge of Conditions 5, 26, 27 and 28 of the outline planning permission granted at appeal under the reference APP/C3810/W/22/3309365 for an Outline planning application with all matters reserved, other than means of access, for the construction of up to 48 dwellings (30% affordable homes) and dental/doctors' surgery (Use Class E (e)).

Please find below a list of the conditions and relevant documents regarding each of these conditions.

Condition 5 states:

No development shall take place until a Construction and Environmental Management Plan (CEMP) has been submitted to and approved in writing by the local planning authority. Thereafter the approved CEMP shall be implemented and adhered to throughout the construction period. The CEMP shall include the following matters:

- a. An indicative programme of works;*
- b. Details of proposed construction hours;*
- c. Details of public engagement and consultation prior to and during the works;*
- d. Measures to minimise noise and vibration (including working hours, piling methods, selection of plant/machinery and noise barriers);*
- e. Floodlighting details;*
- f. The number, frequency and types of construction related vehicles;*
- g. Access and routing of construction vehicles;*
- h. The parking of vehicles of site operatives and visitors;*
- i. Loading and unloading of plant, materials and waste;*
- j. Storage of plant and materials used during construction;*
- k. The erection and maintenance of security hoarding;*
- l. The provision of wheel washing facilities and any other measures to mitigate the impact of construction on the public highway;*
- m. Measures to control the emission of dust and dirt during construction;*
- n. A scheme for recycling/disposing of waste.*

Condition 27 states:

Development shall not commence, other than works of site survey and investigation until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the local planning authority. The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, and the recommendations of the SuDS Manual produced by CIRIA. Winter groundwater monitoring to establish highest annual ground water levels and winter Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage. No building shall be occupied until the complete surface water drainage system serving the development has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Condition 28 states:

Development shall not commence, other than works of site survey and investigation until full details of the maintenance and management of the surface water drainage system is set out in a site-specific maintenance manual and submitted to, and approved in writing, by the local planning authority. The manual is to include details of financial management and arrangements

for the replacement of major components at the end of the manufacturer's recommended design life. Upon completed construction of the surface water drainage system, the owner or management company shall strictly adhere to and implement the recommendations contained within the manual.
