Description and Sources

Description

An historic building survey was carried out on Pear Tree Cottage, Walberton, as part of a Walberton History Group "House Detective" project. The building lies parallel to and to the north of The Street. It is brick faced with a thatched roof and two large brick buttresses. It has lean to additions to the east and west. There is one central stack and one to the eastern end. The building was restored after a period of dereliction in the 1960s.

Pear Tree Cottage originally formed a fully framed 4-bay house with the plan suggesting a two-bay hall flanked by floored "solar" and "service." Where the hall bays are unequal, the narrower bay will generally abut the "service" end,. The larger bay was the "solar." However while this building contains medieval diagnostic elements (jowl profiles, longitudinal flat joisting, plan) there are other elements which place it in the transitional period of the sixteenth century: 1)The longitudinal joists are not as wide as at an earlier period, and appear to be contemporary with the axial girder and joists, the girder being supported by the mid tie. 2) The roof had clasped side-purlins. 3) The sooting pattern indicates the fire (and its smoke) was confined within the narrower bay. 4) The mid-tie at C is supported by studs, which arrangement appears to pre-date the hearth, 5) Original glazed window

All this would suggest that the original build had a half-floored hall. There would have been some kind of 'reredos.' This could be dated to the period 1500-20.

Towards the end of the 1500s a solid stack was built into the 'smoke-bay, providing the opportunity for a single access to both first floor parts of the house and a bread oven, and creating a 'baffle entry'.' An outshot may have been added within a short period to compensate for the loss of space in the 'service' end. Subsequent additions were added towards the end of the 1600s and could be associated with the move towards multiple occupancy. There is a fine painting of a Tudor ship on the plaster panel of the western downstairs room. {1}

Description and Sources

Description

A desk based assessment was carried out on land at Eastergate (Three Villages) in advance of development. The assessment site comprises an area (around 312 hectares) of land mostly consisting of open agricultural mixed use lands and enclosed fields. The Lydney Rife is visible within the central core of the site running north to south.

Bronze Age – the assessment identified widely scattered, limited and fragmented archaeological activity and finds from this period. Within the area of the assessment site, this has comprised a hoard consisting of eight celts and a palstave axe and a Bronze Age urn found off Eastergate Lane in 1954 to the immediate north of the assessment site. It is considered that the potential for Bronze Age archaeological activity and finds to be made on this assessment site is low.

Iron Age - No archaeological activity or finds from the Iron Age period have been made within the area of the assessment site. To the immediate north-east, a boundary ditch containing two residual sherds of Iron Age pottery has been identified. The potential for Iron Age archaeological activity and finds to be made on this assessment site is low. Overall the potential for general prehistoric archaeological activity and finds to be made on this assessment site is also low.

Roman Period - There is some evidence for archaeological activity and finds from the Roman period which have been made within the area of the assessment site. This consists of the site of a probable villa, which has been plotted from prior aerial photographic analysis to the north-west of New Barn. A large assemblage of pottery, fragments of roof tile, oyster shell and animal bone have also been found at this location, supporting this interpretation. To the north-east of the assessment site, a boundary ditch of Roman date has been identified and a fragment of Roman roof tile was found just outside the area of the assessment site. This represents scattered, fragmented and limited evidence of activity and finds, and so the potential is considered to be low to possibly moderate.

Anglo-Saxon - There is no evidence for archaeological activity and finds from this period within the area of the

assessment site; though settlements such as Eastergate and Barnham appear to have had Anglo-Saxon origins from place name evidence. It is considered that the potential for archaeological activity and finds from the Anglo-Saxon period to be made on this assessment site is low.

Medieval period - There is limited, widely scattered and fragmentary evidence for medieval archaeological activity and finds within the assessment area. Sherds of medieval pottery were found on the surface of a ploughed field to the north-west of New Barn and the site of a chapel at Lidsey to the south-west. The site of a second medieval chapel is situated to the immediate south of the assessment site at Sack Lane, Lidsey. Medieval boundary ditches were identified just outside the area of the assessment site which produced sherds of 11th-13th century pottery. It is considered that the potential for archaeological activity and finds from the medieval period to be made on this assessment site is low.

Post-medieval and early modern periods - There is more evidence for archaeological activity and finds from the post-medieval and early modern periods made within the area of the assessment site. The line of the former Chichester-Arundel Canal, survives on the ground as fragmentary earthworks. The site of an associated canal bridge shown on the 1880 map has also been identified here. The impact of potential development on the line, curtilage and setting of this site should be a material consideration in respect of any proposed development on this site. To the east of the present Headhone Farm, is the site of a former 19th century farmstead which is shown on the map of 1880. To the north-east and also within the area of the assessment site is the site of a 20th century brickfield at West Barnham. Within the northern portion of the assessment site, is the site of a second 19th century farmstead at Follyfoot Farm. At Woodgate, and to the immediate west of the assessment site is the site of a former brickworks.

The aerial photographic analysis identified evidence for the earthwork cultivation remains of ridge and furrow, of probable post-medieval date. These were in isolated locations and were highly fragmented and scattered in nature. Given all of these aforementioned factors, the potential for post-medieval and early modern archaeological activity and finds to be made on this assessment site is also considered to be low to possibly moderate.

There are a number of Grade II listed buildings which are located within close proximity to the assessment site. The settings of these various listed buildings in relation to the assessment site will need to be considered in respect of any proposed development within the area of the assessment site.

Overall, the desk based assessment has identified low potential for archaeological activity and finds from the Bronze Age, Iron Age, Anglo-Saxon and medieval periods with a low to moderate potential for Roman and post-medieval/early modern periods. It was noted that the known archaeological activity and finds from all periods both within and without the assessment site is fragmentary, scattered and limited. {1}

Description and Sources

Description

An archaeological evaluation was carried out at Sunny Corner, Walberton, in advance of a residential proposed development at the site. The site consists of an irregular-shaped field which is largely bounded by residential properties and their associated gardens. The site lies at a height of between 16m and 19m above Ordnance Datum. The underlying geology consists of Raised Beach Deposits.

Six trenches were excavated across the site. They were positioned to target those parts of the site which would be most affected by the new buildings and roads. Despite the fact that the site does not appear to have been disturbed in the past, no archaeological finds or features were identified. {1}

South Downs National Park - The High Woods from above NMP Investigation and Analysis Report:
The 'High Woods' area of West Sussex and eastern Hampshire is remarkable in terms of the range, extent and time depth of the archaeological earthworks preserved in the woodland. The HLF supported project provided an opportunity to survey and assess the archaeological remains within this part of the South Downs on a landscape scale. It covered the patchwork of woodland and downs from Arundel in the east to the Queen Elizabeth Country Park (Hampshire) in the west.

A key part of the project was an airborne laser scanning survey, LIDAR, of the whole area (flown in 2014) and aerial photographs taken over the last 50 or more years.

Interpretation and mapping from aerial photographs and LIDAR encompasses a wide range of archaeological features, with potential dates ranging from the Neolithic through to the Cold War, including earthworks and structures, or buried remains revealed as cropmarks and soilmarks. Some features from twentieth century military contexts, such as barbed wire, concrete structures and buildings, were also recorded. The project scope included archaeological features that were visible on historic aerial photographs but have since been plough-levelled or removed. {3}

MWS14507	Group of Former Extractive Pits within Goblestubb's Copse, Walberton (Monument MWS14507)
MWS14508	Possible Later Prehistoric or Roman Rectangular Enclosure, Tortington Common, Arundel (Monument MWS14508)
MWS14509	Slight Earthworks of a Fragmented Bank on Tortington Common, Arundel (Monument MWS14509)
MWS14511	Earthwork remains of a Woodland Bank marking the Southern Edge of Tortington Common, Arundel (Monument MWS14511)
MWS14512	Earthwork of a Rectilinear Enclosure within Binsdted Wood, Walberton (Monument MWS14512)

MWS14513	Earthworks of Braided Trackways within Binsted Wood, Arundel and Walberton (Monument MWS14513)
MWS14514	Former Post-Medieval gravel Pit on Tortington Common, Arundel (Monument MWS14514)
MWS14515	Earthworks of Trackways on Tortington Common, Arundel (Monument MWS14515)
MWS14516	Probable Post-Medieval Quarry, Spinningwheel Copse, Walberton (Monument MWS14516)
MWS14517	Earthwork Remains of Two Post-Medieval Gravel Pits within Binsted Wood, Walberton (Monument MWS14517)
MWS14518	Earthworks of Two Medieval Fishponds within Binstead Wood, Walberton (Monument MWS14518)
MWS14519	Earthwork Remains of a Possible Cross-Ridge Dyke within Arundel Par, Houghton (Monument MWS14519)
MWS14520	Possible Bronze Age Barrow within Arundel Park, South Stoke (Monument MWS14520)
MWS14521	Possible Bronze Age Barrow within Arundel Park, South Stoke (Monument MWS14521)
MWS14522	Possible Remains of a Small Later Prehistoric or Roman Settlement within Arundel Park, South Stoke (Monument MWS14522)
MWS14523	Possible Bronze Age Barrow within Arundel Park, South Stoke (Monument MWS14523)
MWS14524	Earthwork of a Rectilinear Mound within Arundel Park, South Stoke (Monument MWS14524)
MWS14525	Probable Post-Medieval Woodbank within Sherwood Rough, Arundel (Monument MWS14525)
MWS14526	Former Extractive Pits, Screens Wood, Arundel (Monument MWS14526)
MWS14527	Former Chalk Quarry within Screens Wood, Arundel (Monument MWS14527)
MWS14528	Former Chalk Pit within Screens Wood, Arundel (Monument MWS14528)
MWS14529	Probable Post-Medieval Extractive Pit west of Screens Wood, Arundel (Monument MWS14529)
MWS14530	Former Chalk Pit west of Screens Wood, Arundel (Monument MWS14530)
MWS14531	Probable Extractive Pit west of Screens Wood, Arundel (Monument MWS14531)
MWS14532	Probable Extractive Pit within Screens Wood, Arundel (Monument MWS14532)
MWS14533	Probable Extractive Pit within Screens Wood, Arundel (Monument MWS14533)
MWS14534	Former Quarry within The Waterwoods, Arundel (Monument MWS14534)
MWS14535	Former Extractive Pit within The Waterwoods, Arundel (Monument MWS14535)
MWS14536	Post-Medieval Chalk Pit within The Waterwoods, Arundel (Monument MWS14536)
MWS14537	Earthwork remains of Possible Extractive Pit or Dew Pond within Dalesdown Wood, Houghton (Monument MWS14537)
MWS14538	A Small Quarry within Dalesdown Wood, Houghton (Monument MWS14538)
MWS14539	Former Extractive Pits within Dalesdown Wood, Houghton (Monument MWS14539)
MWS14540	Former Extractive Pit within Dalesdown Wood, Houghton (Monument MWS14540)
MWS14541	Earthwork Remains of Medieval Ridge and Furrow, South of Park Farm, Arundel (Monument MWS14541)
MWS14543	Cropmarks of a Length of Curving Trackway, Aldingbourne (Monument MWS14543)
MWS14544	Cropmarks of Post-Medieval Field Boundaries, Aldingbourne (Monument MWS14544)
MWS14545	Site of a World war Two Radar Station, Aldingbourne (Monument MWS14545)
MWS14546	Earthworks of a Former Post-Medieval Quarry, The Arundel Lodge, Arundel (Monument MWS14546)
MWS14547	Earthworks of a Former Post-Medieval Quarry, The Arundel Lodge, Arundel (Monument MWS14547)
MWS14548	Earthworks of a Former Post-Medieval Quarry, West of The Arundel Lodge, Arundel (Monument MWS14548)
MWS14549	Earthworks of a Former Post-Medieval Clay Pit within Binsted Wood, Arundel (Monument MWS14549)
MWS14550	Possible Remains of a Bronze Age Barrow within Sherwood Rough, Arundel (Monument MWS14550)
MWS14551	Former Extractive Pit, Sherwood Rough and Rewell Wood, Arundel (Monument MWS14551)

Event ID: EWS1762 **Name:** Historic England National Mapping Programme for the South Downs

MWS14552	Possible Extractive Pits within Dewell Wood, Houghton and Madehurst (Monument MWS14552)
MWS14555	Cropmarks of a Possible Rectilinear Enclosure within Arundel Park, South Stoke (Monument MWS14555)
MWS14556	Cropmarks of a Possible Enclosure on Rewell Hill, Madehurst (Monument MWS14556)
MWS14557	Cropmarks of Two Small Pits on Rewell Hill, Madehurst (Monument MWS14557)
MWS14558	Cropmark of an Extractive Pit on Rewell Hill, Madehurst (Monument MWS14558)
MWS14559	Earthworks of a Possible Later Prehistoric or Roman Trackway within Arundel Park, South Stoke (Monument MWS14559)
MWS14560	Earthwork of a Possible Later Prehistoric or Roman Trackway within Arundel Park, South Stoke (Monument MWS14560)
MWS14561	Earthworks of an Curvilinear Embanked Enclosure within Madehurst Wood, Madehurst (Monument MWS14561)
MWS14562	Site of a 19th-20th Century Rifle Range within Arundel Park, South Stoke (Monument MWS14562)
MWS14563	Two Broad Lynchets within Madehurst Wood, Madehurst (Monument MWS14563)
MWS14564	Earthworks of an L-Shaped Terrace and Associated Pond within Madehurst Wood, Arundel (Monument MWS14564)
MWS14576	Post-Medieval Extraction Pits within North Wood, Slindon (Monument MWS14576)
MWS14577	Earthworks of a Post Medieval Dew Pond, Warren Barn, Slindon (Monument MWS14577)
MWS14578	Medieval to Post-Medieval Wood Banks, Great Down, slindon (Monument MWS14578)
MWS14580	Possible Post-Medieval Woodland Bank in North Wood, Slindon (Monument MWS14580)
MWS14665	Bronze Age Round Barrow, The Gumber, Slindon (Monument MWS14665)
MWS14666	Bronze Age Round Barrow, The Gumber, Slindon (Monument MWS14666)
MWS14667	Extractive Pit on the edge of Dawtrey's Hook, Slindon (Monument MWS14667)
MWS14668	Extraction Pits within Nore Wood, Slindon (Monument MWS14668)
MWS14669	Possible Former Boundary, Hungerdown Row, Aldingbourne (Monument MWS14669)
MWS14670	Earthworks of Former Extractive Pits, Aldingbourne (Monument MWS14670)
MWS14672	Post-Medieval Extraction Pit, Aldingbourne (Monument MWS14672)
MWS14673	Earthworks of a Mound at the northern end of North Wood, Slindon (Monument MWS14673)
MWS14674	Earthworks of a Mound at the northern end of North Wood, Slindon (Monument MWS14674)
MWS14675	Possible Post-Medieval Trackway, Gumber Corner, Madehurst (Monument MWS14675)
MWS14676	Earthwork Remains of a Post-Medieval Sand Pit, Aldingbourne (Monument MWS14676)
MWS14677	Earthworks of possible Medieval or Post-Medieval Boundary Banks and Enclosure in Houghton Forest, Houghton (Monument MWS14677)
MWS14678	Earthworks of Possible Post-Medieval Boundary Banks, Langham Wood, Houghton (Monument MWS14678)
MWS14679	Post-Medieval Wood Bank in Rewell Hill Plantation, Houghton (Monument MWS14679)
MWS14680	Former Chalk Pit, Aldingbourne (Monument MWS14680)
MWS14681	Probable Post-Medieval Chalk Pit, Aldingbourne (Monument MWS14681)
MWS14682	Two rows of Pits, Westergate House, Aldingbourne (Monument MWS14682)
MWS14683	Former Post-Medieval Quarry, Aldingbourne (Monument MWS14683)
MWS14684	Probable 18th-19th Century Former Gravel Pit, Slindon Wood, Slindon and Walberton (Monument MWS14684)
MWS14685	Probable Post-Medieval Boundary Bank within Houghton Forest and Barkhale Wood (Monument MWS14685)
MWS14686	Remains of a Post-Medieval Boundary Bank, Little Bottom Wood, Madehurst (Monument MWS14686)
MWS14687	An Area of Extraction west of Baycombe Wood, Slindon (Monument MWS14687)
MWS14688	An Extraction Pit within Baycombe Wood, Slindon (Monument MWS14688)
MWS14689	An Extraction Pit within Baycombe Wood, Slindon (Monument MWS14689)

Event ID: EWS1762 **Name:** Historic England National Mapping Programme for the South Downs

MWS14690	Earthworks of Possible Post-Medieval Chalk Pits in Little Bottom Wood, Madehurst (Monument MWS14690)
MWS14691	A Series of Possible Post-Medieval Extractive Pits within Houghton Forest, Houghton (Monument MWS14691)
MWS14693	Earthwork Remains of a Post-Medieval Wood Boundary Bank and Ditch, Trot Row, Madehurst (Monument MWS14693)
MWS14694	Probable Post-Medieval Chalk Pits within Trot Row, Madehurst (Monument MWS14694)
MWS14695	Earthworks of a Post-Medieval Wood Bank and Ditches within Stammers Wood, Madehurst (Monument MWS14695)
MWS14696	Earthwork remains of Two Oval Mounds within North Wood, Slindon (Monument MWS14696)
MWS14697	Slight Earthworks of Possible Medieval Ridge and Furrow, Houghton (Monument MWS14697)
MWS14698	Earthworks of a Possible Post-Medieval Wood Bank within Great Bottom Wood, Madehurst (Monument MWS14698)
MWS14699	Earthwork Remains of a Possible Post-Medieval Boundary Bank within Stammer's Wood, Madehurst (Monument MWS14699)
MWS14700	Earthwork Remains of a Post-Medieval Pond within woodland at Dale Park, Madehurst (Monument MWS14700)
MWS14706	Earthworks of Post-Medieval Woodbanks and Ditches within Stammers Copse, Madehurst (Monument MWS14706)
MWS14707	Site of a 19th-20th Century Gravel Pit, Aldingbourne (Monument MWS14707)
MWS14708	A former 19th-20th Century Gravel Pit, Aldingbourne (Monument MWS14708)
MWS14709	Earthworks of a Possible Post-Medieval Wood Bank, Round Wood, Sutton and Slindon (Monument MWS14709)
MWS14732	Earthworks of Post-Medieval Extractive Pits, Stammers Wood, Slindon (Monument MWS14732)
MWS14739	Extraction Pit within Nore Wood, Slindon (Monument MWS14739)
MWS14740	Earthworks of Possible Medieval Ridge and Furrow, Houghton (Monument MWS14740)
MWS14741	Small Elongated Pits within Nore Wood, Slindon (Monument MWS14741)
MWS14742	Several Dispersed Pits and Depressions within Nore Wood, Slindon (Monument MWS14742)
MWS14743	Possible Dew Pond on Bury Hill, Houghton (Monument MWS14743)
MWS14744	Earthwork Remains of a Former Road, Boxgrove and Aldingbourne (Monument MWS14744)
MWS14745	Slight Traces of Medieval Ridge and Furrow, Boxgrove (Monument MWS14745)
MWS14746	Earthworks of Medieval or Post-Medieval Field Boundary Banks, North Stoke (Monument MWS14746)
MWS14747	Slight Earthworks of Probable Post-Medieval Property Boundary Banks, Houghton (Monument MWS14747)
MWS14748	Earthworks of a Medieval or Post Medieval Parish Boundary Ditch within Coombe Wood, Houghton (Monument MWS14748)
MWS14750	Probable Post-Medieval Field Banks, Houghton (Monument MWS14750)
MWS14757	Earthworks of Medieval or Post-Medieval Boundary Banks, North Stoke, Amberley (Monument MWS14757)
MWS14758	Site of Chalk Pit, South Wood, Houghton (Monument MWS14758)
MWS14759	Site of Chalk Pit, South Wood, Houghton (Monument MWS14759)
MWS14760	The earthwork and levelled earthworks of an earlier road heading west from Houghton (Monument MWS14760)
MWS14762	Slight Earthworks of Post-Medieval Extractive Pits, East of Great Bottom, Madehurst (Monument MWS14762)
MWS14763	Post-Medieval Wood Bank in Whiteways Plantation, Houghton (Monument MWS14763)
MWS14764	Earthworks of Post-Medieval Extractive Pits, Great Bottom, Madehurst (Monument MWS14764)
MWS14765	Earthworks of a Number of Medieval or Post-Medieval Trackways, Bury Hill, Bury and Houghton (Monument MWS14765)
MWS14767	Earthworks of a Post Medieval Pond, Houghton (Monument MWS14767)

Event ID: EWS1762 **Name:** Historic England National Mapping Programme for the South Downs

MWS14768	Cropmarks of a Possible Enclosure and Field Boundary, Slindon (Monument MWS14768)
MWS14769	Post Medieval Wood Bank within Rewell Hill Wood, Houghton (Monument MWS14769)
MWS14770	Number of Post Medieval Extractive Pits within South Wood, Arundel Park, Houghton (Monument MWS14770)
MWS14771	Number of Mounds within South Wood, Arundel Park, Houghton (Monument MWS14771)
MWS14773	Possible Late Prehistoric Cross Dyke within South Wood, Houghton (Monument MWS14773)
MWS14774	Series of Medieval or Post-Medieval Tracks and Hollow Ways through Whiteways Plantation, Houghton (Monument MWS14774)
MWS14775	Cropmarks of a Possible Late Prehistoric Enclosure, Madehurst (Monument MWS14775)
MWS14776	Cropmarks of a Possible Later Prehistoric Enclosure, Madehurst (Monument MWS14776)
MWS14777	Group of Post Medieval Extractive Pits within Stammers Wood, Madehurst (Monument MWS14777)
MWS14778	Earthworks of a Possible Barrow within Arundel Park, South Stoke (Monument MWS14778)

Description and Sources

Description

A detailed gradiometer survey was carried out over land at Eastergate, in advance of the development of the site for the A29 realignment works. The site comprises four sections of arable fields located along the proposed route, with a survey area of 8.4 ha. Section 1 was unsuitable for survey due to overgrown vegetation and although Section 2 was cut prior to survey, this did not correspond to the proposed survey area, but an area slightly to the south was surveyed. Section 3 and 4 were surveyed in their entirety, aside from minor reductions owing to present field boundaries and other obstacles.

The geophysical survey has identified a number of features that are considered to be possible archaeological remains. These are predominantly located in Section 3 and are associated with linear ditch features. Two parallel positive, linear anomalies have been identified traversing the northern portion of Section 3 on a north-west to south-east alignment. The two anomalies are spaced 6 m apart and are 1 m wide. These indicate parallel ditches either side of a possible trackway. Several perpendicular trends are noted to the north-east and south-west of these anomalies, which could represent further ditch-like features associated with this. Towards the southern extent of the scheme, several further linear anomalies have been identified. To the south of Section 3, a weak positive anomaly is located perpendicular to the probable parallel ditches and could indicate a further ditch-like feature. It is possible that collectively these anomalies form part of a wider field system of Iron Age or Romano-British date, relating to known activity of this date in the surrounding area.

In the centre of Section 2, a short positive linear anomaly has been identified. In addition, further weakly positive linear anomalies have also been identified throughout Section 2 and 3. These are interpreted as possible archaeology and could indicate further ditch-like features associated with those in Section 3. However, these anomalies could equally relate to modern agricultural activity or natural variations in the underlying deposits. A large, weakly positive discrete anomaly has been identified in the west of Section 3. This is 11 m in diameter. It is poorly defined, which suggests that it is associated with natural variation in the underlying superficial deposits. However, the circular form suggests that it could be associated with an archaeological feature.

Numerous discrete positive anomalies have been identified throughout the survey results. These are 1 – 2 m in

diameter and indicate pit-like features. Notable examples of these are seen in the south of Section 3, which could be associated with wider archaeological activity. However, it is equally possible these are natural in origin, pertaining to localised variation in the magnetic susceptibility of the underlying superficial deposits. A weakly dipolar, fragmented linear anomaly has been identified traversing the northern portion of Section 3 on a west-north-west to east-south-east alignment. This anomaly corresponds to a former field boundary visible on historical OS mapping (1875). A parallel alignment of increased magnetic responses is noted 80 m to the north. It is possible this also indicates the position of a former field boundary due to its alignment, although this is not recorded on any available mapping.

Three areas of increased magnetic response have been identified across the site, the south-east of Section 2; the south of Section 3 and Section 4. These anomalies are thought to be modern. {1}

Description and Sources

Description

An archaeological evaluation (16/02/2015 - 27/02/2015) was carried out on Land off Fontwell Avenue, in advance of residential and industrial development. The site is irregular in shape and lies on a gentle south facing slope. The site is bounded by Arundel Road to the north, pasture fields to the east, rear gardens to the south and Fontwell Avenue to the west. The majority of the site comprises pasture with a small area of scrubland to the east.

46 trenches were excavated and 16 of these were devoid of any archaeological features. 58 archaeological features were identified across the remaining 30 trenches and four periods were identified. A possible Early Neolithic isolated charcoal-rich pit was identified as well as a heavily truncated Early Bronze Age enclosure. A probable Roman field boundary was located within the site area and a post medieval structure of unknown function. Finds include a small assemblage of struck flints of Mesolithic to Mid Neolithic date.

10 geoarchaeological test were also excavated within the footprint of the excavation trenches. The test pits demonstrated that deposits related to the Aldingbourne raised beach is present in the part of the site investigated. Significant palaeo-environmental deposits with probable biological material potentially exists in the locations investigated, the depths of which may vary across the site. Overall, it is thought that the impact of any groundworks on the site is likely to vary due to the variable nature of the depth of the overburden across archaeological deposits. {1}

An archaeological evaluation (06/06/2016) was carried out on land off Fontwell Avenue, Fontwell. A previous programme of archaeological evaluation was undertaken across the majority of the site in advance of a proposed residential development. The current evaluation was carried out in an area of the site which had not previously been subjected to the earlier evaluation in 2015.

The current evaluation was carried out to provide information about the nature of a series of linear anomalies, observed on Google Earth, which might represent the remains of a former Roman villa farmstead.

Three trenches were excavated during the evaluation the targeting cropmarks/anomalies. A small number of archaeological features were identified within Trenches 1 and 2 with archaeological activity being absent in Trench 3. Trench 1 contained a probable gully with pottery of Late Bronze Age date. It was U-shaped in profile and orientated north-west / south-east. Trench 2 contained two pits of indeterminate function. They are considered to be broadly late prehistoric in date. One of the pits contained some burnt, unworked flint and pottery of a broad Prehistoric date. A single environmental sample was taken from this pit. A single grain of free-threshing wheat was identified and a small quantity of charcoal fragments.

No evidence of any Roman activity or finds were identified or recovered during the evaluation. It was therefore concluded that the aerial linear anomalies do not relate to the remains of a former Roman villa farmstead but instead are likely to be more recent in date and probably relate to agricultural activities undertaken within this part of the site. {2}
