STATEMENT

Cherry Tree Nursery, Eastergate Lane, Walberton, West Sussex, BN18 0BA

1. I, Richard Boucher live at Cherry Tree Nursery together with my wife, Doreen and my son Gary. I make this Statement believing its contents to be true.

2. My wife and I moved to Cherry Tree Nursery in 2013 and prior to that we lived in Bognor but we needed to move back to Cherry Tree Nursery because our son Gary has had significant medical problems and needed our full time care and supervision.

3. I am able to make this Statement from my own personal knowledge and I can confirm that my son Gary Boucher purchased Cherry Tree Nursery in about 1990. He then set about trying to run a nursery, which proved very difficult and as a result he started diversifying into other lines of business in order to generate income to keep the nursery going.

4. Even though we only moved back here in 2013 prior to that date we had been daily visitors for over 12 years because we had to visit on a daily basis in order to look after Gary who needed our help, and he is our only son. Therefore I, together with my wife have been intimately involved in Cherry Tree Nursery since the late 1990's and I am therefore aware of the fact that there have always been uses other than nursery growing on the site.

5. Whilst my wife has spent a lot of her time looking after Gary I have spent a lot of time working on the nursery and making sure it was being run properly, and I needed to make sure that everyone who was on site was being properly managed in order to stop people taking advantage of my son Gary.

6. Therefore every day when we came to look after Gary I would go around the nursery and therefore my Statement is based upon my daily inspections of the site.

7. I can confirm that the site was exactly as it is laid out in the sketch map prepared at the site visit of 4th September 2000 by Arun District Council, which actually states that Mr Boucher was on site, this I attached a copy of that plan as Exhibit 1 to this my Statement.

8. I can confirm that mobile home 8 is still on site, touring caravan 7 is still on site and caravan 9 is also still on site although it has been moved down so that it is now situated adjacent to touring caravan 7.

9. It is my belief that the nursery site has been used as a site for residential mobile homes and caravans for more than 10 years. This is evidenced by the site visit undertaken by Arun District Council in 2000.

10. We are applying for a Certificate of Lawful Use to site one residential mobile home on the rear part of the site as shown edged red on the plan marked as Plan 1 which I attach as Exhibit 2 to this my Statement.

11. Mobile homes and caravans are movable structures and therefore it is important to establish the principle of the on-site accommodation and if the Council were to reject this application then I believe that we could simply repair mobiles home 8 and its right of occupation would continue. This is based upon the fact that it has until very recently been used for full time residential accommodation.

12. Whilst I appreciate that this information has been set out in other Statements I can confirm that the original occupier of mobile home 8 was Mr Ling who worked for LEC Refrigeration. I believe that he would have been in residence on site at the time of the site visit by Arun District Council on 4th September 2000.

13. Mr Ling retired from LEC Refrigeration and after his retirement he could no longer afford the rent that we were charging and so he contacted Arun District Council who paid his rent for him.

14. They inspected the mobile home to make sure that it was suitable accommodation for him. These inspections happened on a regular basis and I ask that Arun District Council to check their records, firstly in regard to the payment of rent and secondly in regard to the inspections that they carried out.

15. Mr Ling continued to occupy the mobile home until he could no longer live on his own and he had to go into full time residential care.

16. When Mr Ling vacated the mobile home we immediately tried to find another occupier and we very quickly found one and Mr Simon Burford moved in. He stayed living in the mobile home until just over 12 months' ago when he moved home to look after his parents.

17. Shortly after he left the mobile home there was a storm which damaged the roof of mobile home 8. We gave some thought to repairing the mobile home but at the same time my son Gary was approached by John Crossling who asked if he could site his mobile home at Cherry Tree Nursery. We agreed that he could do that as a replacement for mobile home 8. Therefore his mobile home is sited within the red line on Plan 1 and in a position that is not dissimilar to mobile home 9.

18. I believe that, as is evident from the inspection undertaken by Arun District Council on 4th September 2000, the rear part of the nursery has been used for stationing mobile homes and the very fact that the current mobile home is in a slightly different location does not change the fundamental principle that the site has always been used for siting residential caravans.

19. Therefore I believe that our application for a Certificate of Lawful Use for siting just one mobile home on the land to the rear of the nursery should be approved.

20. I also understand that the Council have expressed concerns in regard to the track leading up to the mobile home sited by John Crossling but I can confirm that there has always been an access track running up through the Nursery and the only works that have been done to it have been a re-grading and re-surfacing of the track in order to make it usable as a the road leading to the mobile home.

21. I understand that Arun District Council are also concerned about the storage of tyres. I can confirm that when my wife and I returned to Cherry Tree Nursery in 2013 there was an Enforcement Notice from the Environment Agency and we dealt with Nigel Oliver at the Environment Agency in regard to the removal of tyres and I enclose at Exhibit 3 to this my Statement the letter that my I received from the Environment Agency, in fact I recall that the Environment Agency being very pleased with the work that I did in clearing the tyres and thanked me personally for all the effort that I had made in ensuring the site was properly cleared to their satisfaction. I enclose at Exhibit 4 all the receipts for the removal of tyres.

22. I also wish to deal with the storage of boats and cars. As I have said above, when my son Gary was trying to run the nursery he found it very difficult to make it pay and therefore diversified into other ways of gaining an income to try and support the nursery. It was very easy to take in boats and cars and I show the two areas used for storage of boats and cars edged in red on Plan 2 attached as Exhibit 5 to this my Statement, with the boats mainly stored in Area A and the cars mainly stored in Area B.

23. I can confirm that the storage of boats and cars has been going on for a long time and when I was visiting on a daily basis, before we moved back to Cherry Tree Nursery, I would walk round the nursery on a daily basis and I would see and check that everything was in its right place.

24. Therefore I am able to confirm that from my own personal knowledge and inspection of the site boats and cars have been stored at Cherry Tree Nursery for many years and certainly more than 10 years.

25. The boats have primarily been in Area A and the number of boats has varied, which is hardly surprising given our proximity to the sea and the fact that people would mainly store their boats here in the winter. However, as can been seen from a very simple inspection of the site, there are some boats that have not been near the water for many years. There is always a core of a least 3 or 4 boats stored on site but this can rise, particularly during the winter, when we have had as many as 10 boats on site.

26. Turning now to the storage of cars, these cars have been stored over many years and have primarily been stored in Area B on the plan. Once again the cars have varied in number, this is because the cars have tended to come and go depending upon what the owners have wanted to do with them.

27. There are of course a number of non-runners that have been stored here for years and that is obvious by the condition of the vehicle and the growth around the vehicle. This is in my view clear evidence of the length of time that the storage of cars has been going on. There are other cars it is quite obvious have been stored for a shorter period of time.

28. Whilst the number of cars has varied I would say that the number of cars has never been below about 10 and never been more than about 25, but in terms of granting a Certificate of Lawful Use we believe that the quantum of storage is contained simply by the size of the site for which we are applying for a Certificate of Lawful Use.

29. I do not think there can be any concern for any increase in the storage over and above what has been going on for the past 10 years because the amount of storage that can be conducted on site is controlled by the size of the respective storage sites.

30. Therefore I believe that the Certificate of Lawful Use for the storage of boats and cars as proposed should be granted.

I confirm that I make this Statement as a Statement of truth and from my own personal kn[redacted]

Dear Mr Boucher,

I am pleased to enclose a document signed by Ian Walton which cancels the Enforcement Notice previously served on you.

This closes our case and we will not visit your premises again. Ed Schmidt and I would like to thank you for your co-operation and the hard work you have put into remediating the site.

Should you have any questions or any concerns in the future please do not hesitate to contact myself or Ed.
