WA/99/18/DOC

The application appears to relate to matters relating including landscaping, drainage and SUDS. The application site is located in close proximity to the Walberton village conservation area, and as a result, issues related to landscaping are of importance. I note that landscaping proposals are provided which includes the retention of the existing protected trees, along with a large number of new ones. Reference is also made to the provision of thicket.

All trees and shrubs should be native to the area, and of a scale to soften the impact of the development. I refer you to others with greater knowledge related to the most suitable types of trees/plants to be used.

It is considered that the landscaping proposals appear to be acceptable from a conservation officer perspective.
