Subject: RE: WA/99/18/DOC - Condition 38 - Land East of Tye Lane, Walberton

Afternoon,

The badger survey which has been undertaken is discussed within the Ecological Mitigation and Management Plan included within the DOC and with the precautionary measures they have discussed there are taking the precautions needed to ensure badgers aren't harmed / disturbed from the works. The condition asks for the badger survey to be submitted prior to start on site however with the tight deadline (the survey can only be do a maximum of a month before) this is hard to do because of the time a DOC takes to complete. So in this instance we are happy to except the precautionary measures already in place and once the survey is complete this is then submitted to us.

Many Thanks

Liz
