Dear Mike

RE: Ford Lane, Yapton, Arundel

We are pleased to confirm that our fibre optic, high speed broadband service could be delivered to your proposed scheme at Yapton.

According to Ofcom's broadband checker service the highest available predicted download speed in the area is 10 Mbps and the highest available predicted upload speed is 1 Mbps.

Hyperoptic will install a fibre optic broadband connection directly to each home on your development, allowing residents to subscribe to gigabit download speeds of 1000 Mbps and 1000 Mbps upload speeds which is vastly superior to the predicted speeds residents currently receive in this area.

We wish you every success with your planning application, the importance of high-speed broadband is greater than ever before and Hyperoptic will ensure your homes come with the fastest residential broadband speeds in the UK.

Yours Sincerely

Jamie Kurkowski
Head of New Build Housing
Hyperoptic
