

APPLICATION NO: Y/103/18/PL

The archaeological potential of this area was confirmed by the identification of a series of prehistoric burnt mound deposits during the construction beside it of the Bognor to Littlehampton Transfer Pipeline in 1999. In the circumstances the likelihood that this site might contain similar or related archaeological interest should be evaluated by trial trenching ahead of development in order that measures to ensure appropriate preservation might be put in place. This process would be best secured following a version of standard condition ARC1 as follows:

No development shall take place until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved by the Planning Authority.
