The information included within this application picks up minor amendments which have been made through the discharge of condition discussions. Other minor changes have also been made to the layout as a result of the detailed design work that has taken place on the site following planning approval. The proposed amendments included within this application are as follows:

- Footpaths and cycle links have been increased to 3m wide, as agreed within discharge of conditions application Y/131/20/DOC
- Parking spaces serving plots 79-82 have been relocated to ensure adequate health and safety provisions for electric vehicle charging points which may serve the dwellings.
- The pumping station, originally approved to be located to the south of plots 34-36 is no longer required and has therefore been removed.
- The removal of the pump station has allowed for the relocation of the turning head near plot 34, allowing for a better outlook from the properties to the south of the site.
- The play area and SuDs have been moved to the eastern side of the footpath, in the southern area of open space. This change has no effect on the drainage strategy and an updated submission is currently being prepared to re-discharge the relevant planning condition.

- The housetypes at plots 34-36 have been amended in response to the removal of the pumping

station and the relocation of the turning head. The amendment in housetypes gives a better outlook to the south, with natural surveillance over the open space.

- Plots 29-30 and 40-41 have been moved to the south slightly to allow for the necessary clearance to a private drain.
- The information included within this submission includes the amendment to materials on a number of dwellings, as already agreed within application Y/81/21/NMA.

The changes included within this application do not have a material impact on the neighbouring residents and would not warrant re-consultation, either of neighbours, council departments or statutory bodies. It is therefore requested that the non material amendment is granted.

I trust that the information included within this letter is sufficient for the validation and approval of this application, however please do not hesitate to get in contact if you require any further information.

Yours faithfully,

Tilly Whishaw
