This application may affect the setting of a listed building, affects the character & appearance of the Church Lane Conservation area, affects a Public Right of Way and is in CIL Zone 2 and is CIL Liable as new dwellings.

Thank you for your internet representation made on 7th April 2022 which has been recorded as an objection with the comments as follows:

OWPC46350

There is obviously some problems in the design of this application. Reading the PROW comments, the Conservation area comments and the Highway response regarding the turning head, it seems clear that in an attempt to squeeze in further housing major elements in the layout have been overlooked.

The flood risk assessment by GTA of Feb 2022, although assessed as 'low risk', shows a protective bund in the south and south west boundaries which suggests that a form of mitigation is necessary. This is of great concern to the housing that directly joins this application area.

I would also point out that no archaeology assessment trenches were dug in this proposed area as it was to be left as undeveloped. Hence I believe that an assessment should be carried out.

Overall this application should be refused as it does not fulfill any of the necessary requirements and would create undesirable consequences for nearby residents. It is an unnecessary over-development of a site which was designed and agreed to contain up to 100 houses.

Your views as made above will be considered before the application is determined.
