Morning Simon,

Though the survey was not undertaken by a member of the CIEEM it was reviewed by a member, and the methodology which was used is correct. I have had a quick read through the mitigation proposals (which include a translocation exercise) and I am happy with this and for this to be conditioned. The applicant should be aware that the reptile translocation will need to take place and be completed prior to any works starting on site.

Many Thanks

Liz

Dear Liz,

I've received the attached in relation to a site of mine.

I don't need you to spend any sig time looking at this one and I assume it would just be a case of conditioning the mitigation/recommendations set out within the report but I note that the author is not a member of the CIEEM although others at Arbtech are and I assume that is alright?

Kind Regards
