Hi Nicky

I hope I have everything attached that's needed now.

Please find attached the following:

1. 1:50 scale drawing of garage showing location of EV charge.
2. Block plan scale 1:500
3. Block plan scale 1:500 showing location of garage and EV charger
4. PDF's of the EVE SINGLE S-LINE EV charger for information

I would be grateful if you could please let me know you have everything you need now and also what happens next please with an idea of timescales would be really helpful.

With kind regards

Paul Lightfoot

Alfen Eve Single S-line charger

A smart, compact home charger

The Alfen Eve Single S-line charger is small yet powerful. The compact design includes a charging status light, plug (battered or socketed) and cable storage.

Charging speed

Its 7kW capacity will fully charge an average battery from empty in under eight hours – but this will depend on the size of your car's battery.

Alfen Eve Single S-line charger

If you'll get a 7.4kW Alfen Eve Single S-line charger with a 3-year 24/7 help just under eight hours to fully charge your car (at the size of its battery).

Up to £300 with an OLEV government grant – we'll handle all
