Dear Mr Temple,

As promised, please find attached the updated layouts which show the as existing SW system into the adjoining property as per the findings of the CCTV survey. I have also amended the proposed layouts to take on board the recommendations of your Drainage Engineer.. Hopefully this will satisfy his requirements and enable the condition remaining on this project to be approved.

Mrs Roberts has arranged for the additional works to be carried out this coming Monday. Do you think that she will be able to go ahead with that or wait for the engineers final OK?

Regards,
Martin Clewlow

Dear Martin,

Thank you for the email.

That is fine. With these applications we actually require agreement from you for the application to go beyond the 8 week target date. Not like an extension of time but you have to be happy for the consent to run longer than the 8 weeks.

Regards,

Hi Richard

Sorry it has taken time to get back to you, as you can imagine we are stretched without Tom.

Having reviewed the CCTV survey, it is apparent that the existing pipe appears in good condition but is only 100mm diameter. On that basis, the connection from the new extension is acceptable provided that a new manhole (construction details required) is constructed where the new rainwater pipe will connect to the existing pipe.

Also, a minimum 200 litre water butt is to be connected to the new rainwater downpipe via a water diverter/overflow. See enclosed picture of the diverter/overflow arrangement. The water butt will help store water at times when the water butt is empty/partially empty, and when full will overflow back into the piped system.

Please could the applicant provide a revised plan indicating these requirements, so that it can be considered further.

Regards

Paul Cann
