Biodiversity Enhancement Statement

The proposed carport seeks to change uncovered parking area to covered parking area. No existing roof will be affected as the proposed carport roof abuts the existing gable wall.

In light of this it is our opinion that no biodiversity or natural environment exists on the proposed location of the works, thus the site will be unaffected by the proposed carport.

Photo1 shows existing parking area where carport proposed.

Photo 2 shows gable wall where carport will abut. Boundary hedge will be unaffected.

Photo 3 shows aerial of proposed showing existing use as parking area.
