Subject: Fwd: Comments regarding Y/15/17/DOC

Dear Mr Davis,

Please accept my apologies, I have forgotten to also mention when responding to the Site Management Plan, the inclusion of a section regarding the use of high-pitched HGV Vehicle reversing alarms. The use of these alarms are very annoying to us when used.

We would be grateful if the Site Management Plan would include that All HGV Vehicles belonging to SLH (or any future owner of both Old Lake Lane site and John Turner Phormiums site) be fitted with white noise reversing alarms to vehicles before being used at the sites as a mandatory requirement. SLH have in the past agreed to swap the high-pitched reversing alarms with white noise alarms, however, making this a part of the Site Management Plan would ensure (for this aspect) the protection of amenity for local residents for the future, regardless of current verbal agreement, or future operators of both sites.

Also, a section on preventing the use of HGV Lorry horns would be a welcome inclusion.

Many thanks.

Kind regards,
Ralph Mouland and Elaine Freeman
