

Protect a Cycle – Cycle Storage

The Product Introduction

Protect a Cycle™ is unique – it is the first cycle store which has been tested and certified by the Loss Prevention Certification Board and awarded the LPS1175 Security Rating 1 and in addition has achieved the Police SBD mark (Secure By Design) "Preferred Police Specification."

<http://www.securedbydesign.com/companies/membercompany.aspx?company=599&companyname=Trimetals%20Limited>

The product is supplied complete with two stainless steel hasps with two high security padlocks (Sold Secure Gold Approved) which will deter even the most determined thief - but wait there's more - because even if the thief does eventually penetrate he is confronted with a Heavy Duty Ground Anchor (again Sold Secure Approved) complete with High Security Cable (Loss Prevention Board tested) which prevents the cycles from being removed.

Convenient Bicycle Storage that lasts

The generous dimensions of the Protect a Cycle allows up to three adult bikes to be stored together (depending on style) and the clever patented design, which features a spring assisted opening action, allows complete and easy access. Trimetals buildings have a 25 year replacement guarantee against rust perforation on all undamaged PVC- coated panels. All buildings are precision manufactured from modern PVC-coated galvanised steel which is approximately 50% thicker with twice the paint thickness of most comparable products. This material is also maintenance free and fire resistant, all fixings supplied are stainless steel.

Dimensions

Internal	Metric (metres)	Imperial (inches)
Height (front)	1.09	43
Height (back)	1.29	53
Width	1.80	71
Depth	0.84	33

External	Metric (metres)	Imperial (inches)
Height (front)	1.33	52.5
Width	1.96	77
Depth	0.89	35

Hard Base area

The cycle store will be secured to an installed concrete base.

Protect a Cycle information Video

I have added a Protect A Cycle video which summarises the products key features
