Dear Mr Van der Wee,

Town & Country Planning Act 1990 (as amended)

Town and Country Planning (Development Management Procedure) (England) Order 2015

Approval of details reserved by condition imposed under reference Y/121/19/PL relating to Condition Nos 6 - hedgerow mitigation, 9 - pre-commencement site meeting, 12 - foul drainage, 13 - Construction & Environmental Management Plan, 14 - contamination and 15 - bat method statement/mitigation strategy.

The Steddles North End Road Yapton BN18 0DT

Notification regarding the above application:

Condition Number 14

Prior to commencement of the development hereby approved (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved in writing by the Local Planning Authority:

1. A 'Preliminary Risk Assessment' which has identified: all previous (historical) uses; potential contaminants associated with those uses; a conceptual model of the site indicating sources, pathways and receptors; and potentially unacceptable risks arising from contamination at the site.
2. A 'Site Investigation Scheme', based on (1) above to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.
3. Based on the 'Site Investigation Scheme' and the detailed risk assessment (2), an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.
4. A 'Verification Report' providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components, (1) to (4) require the express written consent of the Local Planning Authority.

The scheme shall be implemented as approved above and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of that remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. The report shall also include a 'long-term monitoring and maintenance plan' for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification report, and for the reporting of this in writing to the Local Planning Authority.

Reason: To protect the amenity of residents in accordance with Policies QE SP1 & QE DM4 of the Arun Local Plan. This is required to be a pre-commencement condition because these details have to be agreed and in place before any work commences.

Decision:

Arun District Council have decided to **APPROVE details reserved by this condition**

You have provided a statement to respond to the Condition 14 requirements (dated 01/12/21) which includes a Generic Quantitative Risk Assessment. The Council's Environmental Health Officers have considered the submitted information and have raised no objections provided that the Discovery Strategy detailed at Appendix 6 is followed during construction. The condition is discharged in full.

Please do not hesitate to contact the above officer if you require any further assistance.

Yours sincerely

A handwritten signature in black ink, appearing to be 'NC' followed by a flourish and a period.

Neil Crowther
