

50W / 50 Watt Super Bright LED Floodlight with PIR Sensor =
500W Halogen

These high quality floodlights use one superbright SMD LED chip to emit over 4500 lumens making them an ideal item for replacing old halogen floodlights. The floodlights use only 50w of energy saving you £100s each year and will very rarely need replacing as they have a 50,000hr long life. Another benefit over the halogen floodlights is the fact that they remain cool whilst in use with no UV or IR heat radiation.

The item is simple to install as it has a one metre power lead which can be easily connected to your mains and also includes the fixing bracket so you can easily fit it in place. We have had this item specifically designed to our requirements and it is simply the brightest 50W floodlight available.

These LED Floodlights meet all UK safety regulations (CE and RoHs) and we offer a two year guarantee to any customer whom purchases any item from us. Due to the high quality of our products and installation service we offer our items are regularly used in some of the UK's largest shopping centres, hotels, Celebrity homes, etc... so please buy with confidence..

PIR SETTINGS:

- Light level switch allows you to set the PIR to be activated after dusk
- Duration control allowing you to determine how long the light stays lit for
- IR Trigger sensitivity which accounts for seasonal variations in temperature and unwanted triggering
- The PIR sensor can be moved up or down and has a 110 passive infrared detection angle with a 15m detection range

Wattage	50 Watt
LED Quantity	1pc Extra Brightness SMD COB Chip
Colour Temperature	Warm White (3000k) / Day White (6000k)
Product Dimensions	285mm x 235mm x 135mm
Fitment	Includes fitting bracket making installation a simple process
Input Power (voltage)	240v
Luminous Flux	4500
Halogen Equivalent	500 Watt
IP Rating	IP65
Dimmable	No
Viewing Angle	15/30/45/60 deg
PIR Sensor	Yes
Life Expectancy (hours)	50,000
Certification	CE & RoHs
ErP Compliant	Yes
Warranty	2 Years
