

This architectural elevation drawing shows a two-story house with a combination of brick and siding. The lower level is constructed of brick, while the upper level features horizontal siding. The house has a complex roofline with multiple gables. On the left, a side gable contains two windows, each with a flower box. The central section features a large front window with a flower box and a smaller window above it. To the right, a two-car garage is attached, and a small gable is visible above the garage door. The front entrance is centered on the brick lower level, featuring a small porch with columns. The roof is depicted with a brick pattern on the left side and a shingle pattern on the right side.

Architectural elevation drawing of the rear exterior of a house. The drawing shows a gabled roof with a wide overhang, a brick chimney on the right side, and a brick wall with a small window. The roof is covered in shingles, and the walls are finished with horizontal siding and brickwork.

A detailed architectural line drawing of a two-story house. The house features a gambrel roof with decorative bargeboards. The upper story is finished with horizontal siding, while the lower story and foundation are made of brick. The front facade includes a central entrance with a small gabled porch supported by brackets, and a large multi-paned window to its right. To the left of the entrance is another large window, and further left are two smaller windows. A detached garage with a gabled roof and vertical siding is attached to the right side of the house. The entire drawing is rendered in black lines on a white background.
