

This architectural elevation drawing shows a section of a house. On the left, a brick chimney is visible. The main wall is made of brick and features a small, dark-framed window. To the right, a gabled roof structure is shown, with a dormer window integrated into the slope. The drawing uses fine lines to represent brickwork and a different pattern for the siding on the upper part of the wall.

This architectural elevation drawing shows a two-story house with a gabled roof. The main body of the house is finished with brickwork. On the left, there is a small, single-story porch with a flat roof and a brick base. The porch has a white door with a transom window and a small window to its left. The main house has a large front door with a transom window, flanked by two windows. The upper story features two windows, each with a decorative lintel. The roof is gabled with a dark finish, and the overall style is traditional and clean.

A detailed line drawing of a two-story house. The house features a steep gabled roof with decorative bargeboards along the eaves. The upper story has horizontal siding and two windows with decorative lintels. The lower story has a brick foundation, a small front porch with a gabled roof supported by brackets, and a single window. An attached garage with a gabled roof and vertical siding is located on the right side of the house. The drawing is a black and white line art illustration.
