Dear Miss White,

Town and Country Planning (Pre-commencement Conditions) 2018
Notice of intention to impose pre-commencement conditions

6 No. Residential Dwellings & Associated Infrastructure. This Application Is A Departure From The Development Plan.

Land East Of North End Road & West Of Church Lane Nursery Yapton

From 1 October 2018 section 100ZA(5) of the Planning Act 1990 provides that planning permission for the development of land may not be granted subject to a pre-commencement condition without the written agreement of the applicant to the terms of the condition (except in the circumstances set out in the Town and Country Planning (Pre-commencement Conditions) Regulations 2018).

The following Pre Commencement Condition/s are Proposed:

- 3 All activity at the site is to be carried out in strict accordance with the Arboricultural Assessment and Method Statement, ref. 18063-AA-AN, Barrell Tree Consultancy.

If there is deemed to be a need for any Utility Service Route connections to bisect retained tree Root Protection Areas/Zones, then prior to their installation a Method Statement prepared by an Arboricultural Expert must be submitted that stipulates how this can be achieved without adverse impact on tree roots. Written approval and confirmation of acceptance of this Methodology must be issued before any works are commenced out on site.

Reasons: To comply with BS5837 and policy ENV DM4 of the Arun Local Plan to ensure that retained trees are afforded due respect and appropriate levels of protection such that their ongoing health and vitality is not compromised, and they can continue to enhance the landscape and amenity of the area. This is required to be a pre commencement condition because it is necessary to ensure that trees are fully protected before the ground is disturbed and works commence.

- 4 Before the site is occupied or any machinery is introduced to the site or demolition work or construction work or alterations to existing ground levels takes place a PRE-COMMENCEMENT Site Meeting is to take place between the Planning Authority's Tree Officer and the Arboricultural Expert representing the site owner(s) or other competent person - at this meeting all protective fencing will be inspected to verify it is 'Fit for Purpose' as required under British Standard 5837:2012 and have been erected and positioned exactly as shown on the Tree Protection Plan, ref. 18063-BT1.

Reasons: To comply with BS5837 and policy ENV DM4 of the Arun Local Plan to ensure that retained trees are afforded due respect and appropriate levels of protection such that their ongoing health and vitality is not compromised, and they can continue to enhance the landscape and amenity of the area. This is required to be a pre commencement condition because it is necessary to ensure that trees are fully protected before the ground is disturbed and works commence.

- 5 Prior to the commencement of development, the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved, in writing, by the Local Planning Authority:

1. As based on (a) Soils Ltd.'s Phase I Desk Study Report (ref 16612, dated Nov 2017); (b) Soils Ltd.'s Phase II Ground Investigation Report (ref 16612/GIR, dated Nov 2017); and (c) Soils Ltd.'s Soil Gas Risk Assessment letter report (ref 16615/SGRA, dated Feb 2018) - an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.

2. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in (1) are completed and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components require the express consent of the Local Planning Authority. The scheme shall then be implemented as approved.

Reason: To ensure that the development complies with approved details in the interests of protection of the environment and prevention of harm to human health in accordance with Arun Local Plan policies QE SP1 and QE DM4. This is required to be a pre-commencement condition because these details have to be agreed and in place before any work commences. It should be noted that this is a modified version of the standard condition as the Council is satisfied that the standard initial two stages have already been satisfied.

- 6 No development shall take place, including any works of demolition, until a Construction & Environmental Management Plan has been submitted to and approved in writing by the Local Planning Authority (who shall consult with West Sussex County Council and the Councils Environmental Health Officers). Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters:

- An indicative programme for carrying out of the works;

- Details of the arrangements for public engagement / consultation both prior to and continued liaison during the construction works;
- Measures to minimise the noise (including vibration) generated by the construction process to include hours of work, proposed method of piling for foundations, the careful selection of plant and machinery and use of noise mitigation barrier(s);
- Details of any floodlighting, including location, height, type and direction of light sources and intensity of illumination;
- the anticipated number, frequency and types of vehicles used during construction,
- the method of access and routing of vehicles during construction,
- the parking of vehicles by site operatives and visitors,
- the loading and unloading of plant, materials and waste,
- the storage of plant and materials used in construction of the development,
- The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;
- the provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulation Orders),
- Measures to control the emission of dust and dirt during construction; and
- A scheme for recycling / disposing of waste resulting from demolition and construction works.

Reason: In the interests of the safety/amenity of nearby residents & occupiers of any nearby noise sensitive premises, the safety & general amenities of the area and in the interests of highway safety in accordance with policies D DM1, QE SP1, QE DM1, QE DM2, QE DM3 and T SP1 of the Arun Local Plan and the National Planning Policy Framework. This is required to be a pre-commencement condition because it is necessary to have the site set-up agreed prior to access by construction staff.

- 7 Development shall not commence, other than works of site survey and investigation, until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority. The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, and the recommendations of the SuDS Manual produced by CIRIA. Winter groundwater monitoring to establish highest annual ground water levels and winter Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage. No building / No part of the extended building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to implement the surface water drainage system prior to commencing any building works.

- 8 Development shall not commence until full details of the maintenance and management of the surface water drainage system is set out in a site-specific maintenance manual and submitted to, and approved in writing, by the Local Planning Authority. The manual is to include details of financial management and arrangements for the replacement of major components at the end of the manufacturer's recommended design life. Upon completed construction of the surface water drainage system, the owner or management company shall strictly adhere to and implement the recommendations contained within the manual.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. It is considered necessary for this to be a pre-commencement condition to ensure that the future maintenance and funding arrangements for the surface water disposal scheme are agreed before construction commences.

- 9 No development shall commence until a mitigation method statement has been submitted to and approved in writing by the Local Planning Authority to provide details of how the existing hedgerows are to be retained, protected and enhanced. There must be a 5m buffer zone in place secured by fencing around the hedgerows during construction. The development shall thereafter proceed in accordance with the approved hedgerow protection and enhancement measures.

Reason: Bats use the hedgerows for foraging and commuting and therefore in accordance with the NPPF and policy ENV DM5 of the Arun Local Plan. This is required to be a pre-commencement condition because the hedgerow protection scheme must be in place prior to construction starting.

OPTIONS:

1. Confirm your acceptance in writing by the **19th May 2020**.
2. Choose not respond (i.e. remain silent). If there is no response by the **19th May 2020** the Local Planning Authority may grant planning permission subject to the terms of the pre-commencement condition specified in the notice.
3. Provide comments before the **19th May 2020** on the proposed pre-commencement condition, in which case that condition cannot be imposed.
4. Indicate before the **19th May 2020** that you do not agree to the terms of the proposed pre-commencement condition, in which case the Local Planning Authority may then either:
 - a. grant planning permission without the pre-commencement condition,
 - b. seek written agreement to an alternative pre-commencement condition, or
 - c. refuse to grant permission (if it considers that the disputed pre-commencement condition is necessary to make the development acceptable in planning terms).

If you wish to discuss the contents of this letter, or if there is anything you do not understand, please contact the case officer on the above extension.

Yours sincerely

Neil Crowther
Group Head of Planning

For details of how the Council will deal with your data please refer to our privacy notices on the website www.arun.gov.uk/planning-privacy-statements

If you have provided an email address, all correspondence including the decision notice will be sent by email. It is therefore important that you keep us informed if this changes during the course of this application.
