Subject: Objections to planning application Y/20/18/OUT

Dear Mr. Davis,

Planning application Y/20/18/OUT

Again I write to object to the above application. There can be no justification for building at the entrance to the hamlet of Flansham. The objections for 10 are the same as for 23 or 40. We are a unique rural hamlet which provides the local community with lovely walks, cycle paths and a scenic view to the north of the South Downs. The lane has increased only marginally in size organically. People converting outbuildings and redundant farm buildings, therefore not radically disturbing the overall shape and feel of the area.

We are not a village with a road going through the centre, therefore anyone coming in has to exit the same way. The position of the exit of the proposed housing estate is on a very dangerous bend - bad enough now, but with more people and cars will be lethal.

If allowed to go through, the tranquility of this truly lovely corner of West Sussex will be lost for ever - because it will be the thin end of the wedge! The owners of the property do not appreciate what they have. My objections are not couched in correct planning 'speak' I'm sure, but they are heartfelt and have the benefit of our Hamlet in mind and also those who like to enjoy our rural area so close to urbanization.

I respectfully urge you and your committee to refuse this application.

Yours sincerely,

H.M. Adames (Mrs)
