Subject: RE: Planning Consultation on: Y/24/20/PL

App No: Y/24/20/PL

Address: Fresh Acres Nursery Yapton Lane Walberton BN18 0AS

Proposal: Change of use from Horticultural to storage of containers, caravans & garden equipment, erection of palisade fencing to front of site behind the existing hedgerow, increase planting buffer to front & sides. No. CCTV cameras.

Bats

The lighting scheme for the site will need to take into consideration the presence of bats in the local area and the scheme should minimise potential impacts to any bats using the trees, hedgerows and buildings by avoiding unnecessary artificial light spill through the use of directional light sources and shielding.

We require that bat boxes are installed on the buildings onsite facing south/south westerly positioned 3-5m above ground.

The hedgerows on site are used by bats for commuting and foraging and will need to be retained and enhanced for bats. This will include having a buffer strip around the hedgerows (5m) and during construction fencing should be used to ensure this area is undisturbed. Any gaps should also be filled in using native hedge species to improve connectivity. Conditions should be used to ensure this.

Reptiles

To ensure the site remains unsuitable for reptiles, continued management of the site must take place to ensure reptile habitat does not develop onsite. If this is not possible then a precautionary approach should be taken within the site with regards to reptiles.

Nesting Birds

Any works to the trees or vegetation clearance on the site should only be undertaken outside of the bird breeding season which takes place between 1st March – 1st October. If works are required within this time an ecologist will need to check the site before any works take place (within 24 hours of any work).

We would like a bird box to be installed on the building / and or tree within the garden of the property.

Kind Regards

Liz
