Clockbarn, Tannery Lane
Send, Woking GU23 7EF

25th April 2018

Dear Stephen

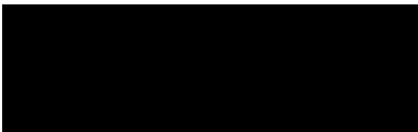

RE: Ref 9451 - Kings Close, Yapton

Following our site supervision on 17th, 18th, 19th, 20th, 23rd and 24th April 2018 I'm writing to confirm that no Japanese knotweed rhizome was discovered within the excavated soils.

If viable knotweed was present in the ground this would have been easily visible to us during the supervised excavation works. I'm therefore confident to confirm that the soil you intend to consign off-site can be consigned as knotweed-free.

Please feel free to give me a call if you wish to discuss further.

Yours sincerely

Nicolas Seal CEnv, MIEMA, BSc(Hons)
Director
