Subject: FW: Y/42/26/L Bonhams Farm House

Hi,

I have reviewed the attachment and provide the following:

Having reviewed the information provided, it appears that the proposed floor construction retains the historic brick floor in situ beneath the new flooring and has been designed using breathable materials throughout. The submission also states that the geotextile membrane will prevent the insulation fill from clogging the joints between the historic brick setts, thereby preserving the historic floor for future reversal. Whilst I am not in a position to comment on the technical performance of the proposed floor construction, on the basis of the information submitted I have no conservation objection to the proposal

I hope this helps

Kind Regards

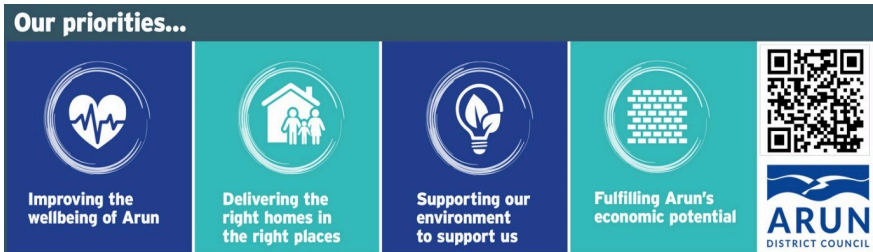

Martyn

Martyn White

Dear Mr White,

Are you able to have a look at this for us please, in response to your comments.

Thank you

Oliver

Hi Oliver,

Thanks for sending these across. It looks like this should be the info requested. I will need to confirm with Conservation Officer, he is on leave until 29th so will be in touch after.

Kind regards,
Rhiannon
