Thursday 3rd August 2017.

Dear Mr Davis.

We wish to register our strong objection to the proposed development of up to 70 dwellings on green belt land known as Stakers Farm, North End Road, Yapton West Sussex, on the following grounds :-

It is a haven for wild life including, Green Woodpeckers, Kestrels, Crows, Magpies, Buzzards, plus other species who use the fields as feeding grounds.

When walking the footpath from North End Road across the fields to the Barnham Road, we see different Butterflies, and Bees feeding on the various flowers and hedgerows, we are constantly being encouraged to protect these Bees, as without their pollination all crops and vegetation will suffer and we will all be the poorer.

We are of the opinion that there is insufficient infrastructure to support the possibility of up to an additional 200/250 residents, for School, Doctors, etc.

North End Road suffers from a constant stream of H G Vs using the road to access the various industrial units scattered around the area, and as short cut to the main A27 trunk road.

This proposed development would completely decimate this pristine habitat and working land, when there are other more sustainable sites available, we strongly urge you to reconsider and reject the proposal.

Thanking You in Anticipation.

Bill and Chriss Taylor.
