Subject: RE: Update to Highways England response re. Outline planning application Y/49/17/OUT - Land at Street Buildings, North End Road

Dear Mr Collins,

I copied you into Highways England's final substantive response on planning application Y/49/17/OUT - Land at Street Buildings, North End Road, yesterday. As such you now have our formal position on this application. If you wish to have an explanation of that decision I am happy to advise.

I can confirm that the email communication to which Mr Eastham has referred did not advise Arun District Council that Highways England had withdrawn its objection and in no way offered a substantive response. The communication was purely officer to officer. The officer to officer communication advised Mr Eastham that Highways England had yet to make its final decision but that position would in all likelihood be a Conditional response subject to any consent that the council might be minded to grant. Officer to officer communication is covered by non-disclosure under 36(2)(b) FOI which allows free and frank provision of advice or exchange of views. We are not in a position to explain why the officer advised you that Highways England had provided a final response in this regard or why he chose to advise that our position was a withdrawal of objection as this was not the case.

I trust that this clarifies.

Kind regards

David

Subject: FW: Update to Highways England response re. Outline planning application Y/49/17/OUT - Land at Street Buildings, North End Road
Importance: High

Mr Brown/Mr. Franklin/Mr. Bowie/Elizabeth Cleaver (HE) and/or Mr. Eastham (ADC)

Please can I have a reply to this e mail and that below together with a copy of the e mail from HE to Mr Eastham at ADC as requested by return.

The e mail can of course be obtained via a FOI request but since it comes from a statutory consultee on a current planning application it should be in the public domain in any case so withholding the e mail pending such a request would seem to be a waste of everybody's time and public/private money.

Thank you

Paul Collins BA (Hons) DipTP

Subject: RE: Update to Highways England response re. Outline planning application Y/49/17/OUT - Land at Street Buildings, North End Road

Importance: High

Mr Franklin

I am advised by Mr Eastham of Arun District Council that in view of the attached HE has now confirmed to ADC by e mail that the HE objection and advice regarding my clients application Y/49/17 set out in your e mails below (copied to me at the time and on the public file) have been withdrawn but that the e mail is marked "Strictly confidential" and ADC feels unable to provide me with a copy or place same on their file. Such matters raised by a statutory consultee are not and cannot be "strictly confidential" in the context of the lawful determination of a current planning application by ADC and should in the interests of openness and transparency be on the public file.

Therefore please can I have a copy of the e mail to ADC to which Mr Eastham has referred withdrawing the HE objection by return so that I can request that it is placed on the public file by ADC.

In the meantime I have requested that ADC place this e mail on the public file.

Thank you

Paul Collins BA (Hons) DipTP

Subject: Update to Highways England response re. Outline planning application Y/49/17/OUT - Land at Street Buildings, North End Road

Dear Mr Eastham,

Further to our email below, I note that you sent a letter on 31st October 2017 requesting that Mr Collins (copied for expediency) coordinates with fellow landowners/developers in order to prepare a Masterplan to cover proposed residential development on land between Bonhams Field and Land at Street Buildings. I am just emailing to see whether this has been progressed?

We also note that an *“Addendum to the Design and Access Statement dated 7 July 2017”* prepared by Mr Collins was uploaded to the application website in December 2017. We have reviewed the document and have the following comments:

- Paragraph 2 states *“In the absence of an up to date adopted Local Plan and/or Neighbourhood Plan the relevant transport issues associated with this proposal need to be considered in the context provided by Framework Paragraph 32.”* As previously outlined, Highways England is concerned about the development’s impact on safety as well as capacity at the A27 / Yapton Lane junction, and a Transport Statement or Assessment has not been provided to demonstrate that the impact on safety and capacity is not severe. As such, our advice is that such an assessment is provided prior to further consideration of this application. This advice is given in accordance with Planning Practice Guidance to the NPPF Paragraph: 013 Reference ID: 42-013-20140306. It should also be noted that in the document *“The strategic road network - Planning for the future – A guide to working with Highways England on planning matters”*, paragraphs 100-102 outline that emerging Local Plans should also be taken into account.
- Paragraph 5 states *“The lack of need for any off site improvements to the existing Transport Infrastructure to accommodate this scheme is based on the view that the development would not generate significant amounts of movement that would result in any material impact on existing Transport infrastructure requiring mitigation.”* However, as previously outlined, a proper Transport Statement or Assessment has not been provided to back up this view and our advice is that this should be provided. This advice is given in accordance with Planning Practice Guidance to the NPPF Paragraph: 014 Reference ID: 42-013-20140306
- Paragraph 7 states *“This addendum therefore provides the Stage 1 Road Safety Audit (RSA) and the TRICS Output data requested by the LHA.”* (i.e. West Sussex County Council). However, the document does not address Highways England’s concerns as outlined in the email below and attached.
- Paragraph 9 incorrectly applies a 30% reduction to the trips in Table 1. The trips in Table 1 are not person trips they are already vehicle trips.
- Paragraph 10 states *“In our submission increases of this magnitude will not lead to any material impact on the local transport network or junctions requiring mitigation...”*. However, a Transport Statement or Assessment has not been provided within the submitted information to back up this statement.

Therefore, our initial substantive response remains as outlined previously - i.e. a Transport Statement or Assessment has not been provided to demonstrate that the development will not result in a severe impact on the A27 / Yapton Lane junction (which should consider safety as well as capacity in accordance with the tests set out in DfT C2/13 para 10 and DCLG NPPF para 32). As such, Highways England’s advice is to recommend that the application should not be determined (other than a refusal) until such time as the required information is provided and Highways England given opportunity to consider and make its final substantive response.

Regards,
Sent on behalf of Kevin Bown, Spatial Planning Manager Area 4

Subject: FAO Mr Collins: Highways England response to emails of 23, 30 and 31 August 2017 re Outline planning application Y/49/17/OUT - Land at Street Buildings, North End Road

Dear Mr Collins,

Application: Arun District Council Y/49/17/OUT

Location: Land at Street Buildings, North End Road, Yapton, BN18 0DT

Proposals: Outline application with some matters reserved for the demolition of all existing structures & redevelopment of the site with up to 45 dwellings (30% affordable (up to 14) & 0.3 hectares of landscaped open space with vehicular access from Maypole Lane & pedestrian/cycle access only from North End Road. This application is a Departure from the Development Plan & may affect the setting of a listed building.

Highways England Ref: 78566

Thank you for your emails of 23, 30 and 31 August 2017, the contents of which are noted.

However, we also note that a Transport Statement or Assessment has still not been provided in support of the application that assesses the cumulative impact of the proposed development, in conjunction with all other allocated, permitted and/or relevant proposed development, on the A27 Trunk Road, as requested in our email of 9th August 2017 as attached.

As always, Highways England needs to be as certain as possible that any adverse impacts of development on the SRN can be identified and then, as appropriate, either be accommodated safely within the operational capacity of its road network; or, where not achievable, suitable deliverable highway improvements are provided as part of development. In this respect, we are aware that the A27 / Yapton Lane junction is a sensitive location from our knowledge and experience of the SRN, and thus we must make sure that the operation and safety of the junction is protected in response to both individual and cumulative impacts.

Therefore, I draw your attention again to DfT circular 2/2013 *'The Strategic Road Network and the Delivery of Sustainable Development'*, and in particular para 22, noting that this proposed development currently falls outside of the emerging Arun Local Plan (which will be subject to examination in public in later this month) and hence requires a full C2/13 compliant impact assessment to be conducted. Until such an assessment is provided and the impacts are known and mitigations determined, it is impossible to say for sure whether or not these are deliverable.

As such, as the required assessment has not been provided to date, Highways England has no option but to recommend that the application should continue not be determined (other than a refusal) until it is provided. This is consistent with other applications that we are considering within the area and elsewhere.

I trust that this is of assistance and if you require further information please contact us accordingly.

Regards,

Sent on behalf of Kevin Bown, Spatial Planning Manager Area 4
