Subject: RE: Y/49/18/PL - land east of North End Road, Yapton

Hello Simon,

Apologies for the initial lack of detail. I appreciate the following may seem a little onerous but hopefully the below suggestions will suffice as we can discharge the conditions once the relevant parts have been met.

For the hours of operation, could we please add:

- No demolition or construction work expect between the hours of:
08.00 – 18.00 hours Monday to Friday
08.00 – 13.00 hours Saturday
No working on Sunday or Bank Holidays

For the PCL, please may we add:

- Prior to commencement of the development hereby approved (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved in writing by the Local Planning Authority:
 - (1) A preliminary risk assessment which has identified: all previous uses; potential contaminants associated with those uses; a conceptual model of the site indicating sources, pathways and receptors; potentially unacceptable risks arising from contamination at the site
 - (2) A site investigation scheme, based on (1) above to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site
 - (3) The site investigation results and the detailed risk assessment (2) and, based on these, an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken
 - (4) A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements

for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components require the express consent of the Local Planning Authority. The scheme shall be implemented as approved above and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. It shall also include any plan (a 'long-term monitoring and maintenance plan') for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification plan, and for the reporting of this to the Local Planning Authority.

For the dust management, please may the following go on:

- No development shall take place, including any works of demolition, until a Construction Environmental Management Plan has been submitted to, and approved in writing by, the Local Planning Authority. The approved Plan shall be adhered to throughout the construction period. The Plan shall provide for:
 - a. an indicative programme for carrying out of the works
 - b. the arrangements for public consultation and liaison during the construction works
 - c. measures to minimise the noise (including vibration) generated by the construction process to include hours of work, proposed method of piling for foundations, the careful selection of plant and machinery and use of noise mitigation barrier(s)
 - d. details of any floodlighting, including location, height, type and direction of light sources and intensity of illumination
 - e. the parking of vehicles of site operatives and visitors
 - f. loading and unloading of plant and materials
 - g. storage of plant and materials used in constructing the development
 - h. the erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate
 - i. wheel washing facilities
 - j. measures to control the emission of dust and dirt during construction
 - k. a scheme for recycling/disposing of waste resulting from demolition and construction works

Thanks ever so much,

Kate.

Hi Kate,

A couple of questions please.

What are the standard hours of working?
Can you suggest conditions for items 1 and 5.

Kind Regards

Simon J Davis MRTPI | Principal Planning Officer, Planning Department, Directorate of Place, Arun District Council |

Subject: Y/49/18/PL - land east of North End Road, Yapton

Good afternoon,

In relation to the above application, please note that based on the comments provided in Soils Ltd. Phase I Desk Study (ref.: 16671/DS, dated January 2018) and Soils Ltd. Phase II Ground Investigation report (ref.: 16671/GIR, dated February 2018), EH recommend the following points:

- further sampling should be undertaken to determine the extent of the asbestos contamination
- the groundwater monitoring report should be provided when complete
- prior to occupation of any of the dwellings, a scheme for the provision of facilities to enable the charging of electric vehicles to serve the approved dwellings shall be submitted to the local planning authority for approval and thereafter implemented in accordance with the approved details and the charge points shall thereafter be permanently retained and maintained in good working condition (Reason: new petrol and diesel cars/vans will not be sold beyond 2040 and to mitigate against any potential adverse impact of the development on local air quality, in accordance with policy QE DM3 (c) of the Arun Local Plan, the Arun District Council Electric Vehicle Infrastructure Study (November 2017) and the NPPF.)
- the standard hours of operation should be applied to the application
- a robust methodology for the minimisation of dust generation and suppression of dust should be submitted to the LPA, if required.

Should you have any queries, please do not hesitate to make contact.

Many thanks,

Kate.
