Dear Ms Heaton,

Section 96A of the Town & Country Planning Act 1990 (as amended)
Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended) - Article 10

Application for a non-material amendment following the grant of Y/14/14/ for change from string inverters and transformers back to centralised inverters as originally applied for. Shift of point of access into field eastwards resulting in a shorter length of access track and minor changes to the panel layout within the site.

Land associated with Rookery Farm, North of A259, Felpham,

I refer to your recent application for a Non Material Minor Amendment. From the information submitted I am of the view that the proposed changes can be accepted as a non-material minor amendment to the approved scheme.

These changes are identified on the following approved plans:

- Drawing 2015-06-02 "Rookery Farm"; and
- ABB Solar Station Plus Central Inverter Station Specification (4 sides).

The proposed changes consist of the following:

- Change from the string inverters and transformers shown in the NMA back to centralised inverters;
- Eastwards shift of the point of access into field, resulting in a shorter length of access track; and
- Very minor changes to the panel layout within the site.

The amendments proposed are considered to be minor alterations to the scheme. The changes to the access track are considered to be positive and although the change in respect of the inverters will increase the impact, it is noted that you are simply reverting back to the original approval. Therefore, the application for a minor amendment is accepted.

Please note that the plans listed above now become part of the approved plans.

I trust this information is of assistance to you.

Yours sincerely

decnma
