

The floor plan illustrates a symmetrical four-unit residential building. The left half contains two identical units, each featuring a living area, dining area, kitchen, bathroom, and two bedrooms (Bed 1 and Bed 2). The right half contains two identical units, each featuring a living area, dining area, kitchen, bathroom, and two bedrooms (Bed 1 and Bed 2). The units are separated by a central hallway and stairs. The plan includes labels for 'Bed 1', 'Bed 2', 'Bath', 'Living', 'Dining', 'Kitchen', 'St.', 'Lin.', and 'W.'.

This architectural drawing shows the exterior elevation of a building. The structure features a steep gabled roof with a decorative ridge. The walls are constructed from brick. On the right side, there is a small, square, multi-paned window or door. The drawing is a technical line rendering, typical of architectural blueprints.

The floor plan shows three identical flats arranged in a row. Each flat consists of a Living room, Dining area, Kitchen, Hall, Stairs, W.C., and Bed 1. The rightmost flat also includes a Bath and a Kitchen/Dining area. The plan is labeled with room names and includes architectural details like doors, windows, and furniture.

A 3D perspective rendering of a two-story brick building. The building features a gabled roof with a textured surface, possibly representing shingles or a specific brick pattern. The facade is made of light-colored bricks. There are several windows: two large rectangular windows on the second floor, and a combination of smaller rectangular and square windows on the first floor. Two small, gabled porches with decorative wooden frames are located on the first floor. The building is set on a dark gray rectangular base, and a soft shadow is cast to the left.
