

This architectural elevation drawing shows a two-story house with a gabled roof. The exterior walls are finished with brickwork. The roof is covered in shingles. The front facade features six windows: three on the second floor and three on the first floor. The central entrance is highlighted by a small, decorative porch with a gabled roof supported by columns. To the right of the main house, there is an attached structure, possibly a garage, with a similar gabled roof and a large door.

This architectural elevation drawing shows a two-story house with a gabled roof. The exterior walls are finished with brickwork. On the ground floor, there is a small front porch with a gabled roof supported by a single pillar, featuring a glass door. To the right of the porch is a large double door, and further right is a large window. The second floor has three windows: a single window on the left, a single window in the center, and a larger double window on the right. A shadow is cast by the porch onto the main wall of the house.

A 3D perspective rendering of a two-story brick house. The house features a gabled roof with a smaller gable over the front porch. The front porch has a small triangular pediment and a single door. There are four windows on the front facade: two on the first floor and two on the second floor. A detached garage with a gabled roof and a single door is attached to the side of the house. The entire structure is built of brick and sits on a dark grey foundation.

This floor plan shows a house with a large living area on the left containing two sofas and a coffee table. A central hall provides access to a bathroom (W.C.), a utility room, and a staircase. The utility room is adjacent to the kitchen/living area, which includes a dining table and chairs. A large garage is attached to the right side of the house. The plan also shows a front entrance, a back door, and a window with a flower box.
