Hi Murray

Yes I can confirm that the broadband speed will be over 24Mb.

Regards

Hi Stephen,

Thank you for the prompt response. Are you able to confirm that as a minimum we will be achieving at least 24Mb locally in Yapton? Although the below response states you are required to provide us with fibre as per Openreach's policy, the planners will more than likely pick-up on the fact we have not confirmed specifically that our site will be achieving minimum internet speeds of 24Mb.

Kind regards,

Murray Armstrong

Good Afternoon Murray

Openreach policy is to provide sites of 20 plots or more with fibre. If you click on the link below it contains lots of useful links to fibre and registering.

[REDACTED] follow the link for fibre broadband/ fibre for developers. I believe they are offering speeds up to 1Gb now.

Hi Stephen,

Thanks for taking my call earlier. As discussed, our new site at the above location consisting of 108 residential units has a pre-commencement condition which states:

'...the strategy shall take into account the timetable for delivery of 'superfast broadband' (defined as having a headline access speed in excess of 24Mb or more)...'

our

You mentioned the site would be eligible for fibre broadband and as such would be achieving speeds well in excess of 24Mb, potentially up to 300Mb. A quick email response from yourself confirming you happy with this statement would be greatly appreciated. I believe at this point, your response would be satisfactory to clear the condition.

Many thanks and I look forward to hearing from you.

Kind regards,

Murray Armstrong
