ESTIMATE

Dear Mr and Mrs Bennett

I wanted to confirm our agreement reference the works to the Barn in the field to the rear of your house.

- I understand that you will be building your barn as and when money allow.
- For now, I would like to confirm that I will dig the trench as detailed on the plans you gave me last week dimensions fifteen meters by ten meters "15x10 meters"
- I will then mix and pour the concrete into the footings to within 150mm from surface
- When the concrete has set, we will scrape, level the brick rubble over the slab for the future.
- Water from your taps in the field, power from your green cabinet.

You will supply all materials, we will use the materials in and around the barn, and the brick rubble behind the fence, if I need more then I will let you no in plenty of time.

Please can you make sure the ponies in the field are in a closed area.

It is your responsibility to have any permissions in place, I will let you no when the trench can be inspected by the council.

Please can you make sure your digger is to hand by midday, and a spare can of fuel.

Labour only, estimated sum £1,330.00 "One thousand seven hundred and thirty pounds"

Yours faithfully Mark Hackett "Sph"

28/01/12.
M.H.
