Good morning Laura,

Thank you for your email.

I usually response immediately on such an emails, however yesterday was my day off.

I am sorry but it is not up to me to wait or not; DOC application should be decide on time, we do not give this opportunity

to anybody. For this reason we inform the agent/applicant of any comments (especially with regards to drainage) and give them certain period of time to address the requirements.
In case the Drainage Engineers would not have enough time to assess further information provided (deadline is on 20/08/21), your application would be refused and you will need to make a revised submission.

Kind regards

Maria

Morning Maria

Just to let you know the applicant's drainage consultant and your colleague Laura are due to catch up next week on Tuesday 17/08 to discuss requirement and seek to agree a way forward.

In light of such, could you please wait until our colleagues have discussed before proceeding to a determination.

Kind regards
Laura

Morning Laura,

The deadline of your application is on 20-08-21
and we have to issue decision this day.

Therefore, please keep in mind if want to address Laura's comments (Drainage Officer) it should be ASAP,
since there is a guarantee the Drainage Officer would have enough time to assess it.

Kind regards

Maria

Mmorning Maria

Hope you are well and enjoying the sunshine.

I have just returned from annual leave and catching up on emails.

Further to the email below, I am checking details with our drainage consultant and will provide a response shortly.

I would be grateful if you could hold fire on issuing the decision for now and I will be back in touch ASAP.

Kind regards
Laura

Subject: Y/88/21/DOC

Dear Laura,

Please see below the comments of our Drainage Officer.

Condition 5

1. The applicant has completed summer infiltration testing which indicate infiltration is not viable.
2. No winter groundwater monitoring results have been provided, this information must be supplied to evidence that groundwater will not get into the surface water drainage system.
3. The proposal is for an unlined system to be pumped. This could in winter result in groundwater being pumped.
4. Pumping is not supported, it is not a sustainable solution. Pumps also fail and can result in increased flood risk both on and off site. The applicant must submit a revised gravity scheme.
5. The proposals are to pump surface water to the on site reservoir. The statement claims that no surface water will be discharged off site. No evidence has been submitted to evidence that either the existing surface water drainage network or reservoir have the capacity to accept these additional flows. The reservoir must also have an overflow to somewhere for water to be discharged in times of exceptional rainfall when irrigation demands are less, i.e. the winter. Therefore the statements provided are not supported by ourselves.

Condition 6

It is not possible for us to recommend discharge of this condition at this time with the strategy presented. A fully revised surface water drainage design is required, which may involve a gravity outfall to watercourse.

Given the above points and the current proposals failures to meet policy requirements we recommend that this application is refused.

Kind regards

Maria
