David

Further to your email, and that from Karl Roberts last Friday, in the circumstances I can confirm my client's agreement to extend the time for determination of this application until the 12th September. This would allow the application to be reported to Committee on 5th September 2018, and provides a week thereafter to complete the associated S106. I understand that this position is consistent with that agreed by Landlink.

I would be grateful for your confirmation of receipt of this email, and if you would circulate dates for the proposed meeting referenced by Karl in his email.

It would be helpful in advance of such a meeting if Officers could identify what their outstanding concerns are. The concerns referenced in recent correspondence were very high level and new to us, so we remain somewhat unclear on the issues between us. Such clarity would allow us to consider them fully and make our meeting as positive as possible.

Thank you

Adam

Dear Lisa and Zoe,

Following on from the email from Karl Roberts in relation to the above planning applications on Friday afternoon I can advise that I need to speak with Karl to confirm who from the LPA will be attending and once I have this information I can identify and distribute dates/times.

I am also aware from conversations with Karl and Neil on Friday that we will require written confirmation of agreement to an extension of time for the determination of these applications. This will allow further discussions to be undertaken and solutions identified to address the concerns of the LPA. I have been advised that failure to secure extension of time agreements on these applications will result in the LPA presenting these applications to the Development Control Committee on the 6th June 2018.

Therefore, I would be grateful if written confirmation could be provided confirming your agreement to an extension of time for determination until the **1st September 2018** in accordance with the request from Karl Roberts in his email of the 25th May.

Many thanks,
David Easton
