Thank you for our conversation today.

As a supplement to section 7 of the application, I would like to add that, while we remain firmly of the intention of creating a laurel hedge as described in section 7, we have been looking at further options for planting separate trees in addition. We have taken advice on trees that will contribute better to the character of the conservation area and create better and more varied habitats for wildlife.

We currently envisage a mixture of *Quercus hispanica*, *betula utilis jaquemontii*, possibly *magnolia grandiflora* and / or a tall variegated holly.

I hope this is helpful.

Best wishes,

Philip Kinnersly
