

PARKING PROVISION TECHNICAL NOTE

Project Name : Burndell Road, Yapton

Job No. : 18-070

Note Title : Parking Provision

Author : TDM

Approved : RJH

Date : 07/08/2019

1.0 INTRODUCTION

1.1 Odyssey have been instructed by Bovis Homes to prepare this Parking Provision Technical Note in support of their Reserved Matters Application (RMA) for the residential development at Burndell Road, Yapton. This follows the grant of outline planning permission on 13th October 2017 (Ref: Y/19/16/OUT).

1.2 The description of the development at the outline application was:

“Outline application for the development of a maximum of 108 No. residential dwellings, vehicular access from Burndell Road, public open space, ancillary works & associated infrastructure.”

1.3 The aim of this Technical Note is to support the discharge of Conditions 22 and 23, of the aforementioned planning permission, which are set out below:

Condition 22

“No part of the development shall be first occupied until the car parking for that part of the site has been provided in accordance with plans and details to be submitted to and approved by the local planning authority. The approved spaces shall thereafter be retained at all times for their designated purpose.”

Condition 23

“No part of the development shall be first occupied until covered and secure cycle parking spaces for that part of the site have been provided in accordance with plans and details to be

submitted to and approved by the local planning authority. The approved spaces shall thereafter be retained at all times for their designated purpose.”

2.0 CAR PARKING

- 2.1 The West Sussex County Council (WSCC) Parking Calculator, as summarised in **Table 2.1**, has been used to determine the expected parking demand for the development. The full parking calculator output has been included in **Appendix A**.

Table 2.1 – WSCC Parking Calculator Summary

No. Bedrooms	Allocated	Unallocated	Visitor	Total
1 Flat	12	1	2	15
2 Flat	10	1	2	13
2 House	36	1	4	41
3 House	98	7	9	114
4 House	58	1	4	64
Total	214	11	22*	247

*error due to rounding

- 2.2 As can be seen the calculator gives a total demand of 214 allocated spaces, 11 unallocated and 22 visitor spaces.
- 2.3 The proposed layout provides a total of 269 parking spaces (including garages). The garages provided exceed the minimum internal dimensions of 3m x 6m, and as such are eligible for inclusion in the total provision.
- 2.4 The layout has been designed to provide as close as possible the parking demand expressed by the parking calculator, giving 215 allocated spaces, 54 garages (allocated spaces), 10 unallocated spaces and 21 visitor spaces.
- 2.5 Given the abundance in parking provided throughout the development, the shortfall of a single unallocated space and one visitor space, is not considered to be cause for concern, especially given the overall provision exceeds the total demand calculated, by 22 spaces.
- 2.6 In accordance with the parking demand calculator, 215 spaces shall be allocated, typically based on 1-space per flat, 2-spaces per 2/3-bedroom house and 3 or more spaces per 4 or more-bedroom house. **Appendix B** contains the accommodation and parking allocation schedule.

PARKING PROVISION TECHNICAL NOTE

- 2.7 In addition, a total of 9 unallocated spaces and 22 visitor spaces are proposed, these being distributed throughout the development. **Drawing 18-070/102C** shows vehicle swept path analysis of the proposed parking layout.

3.0 CYCLE PARKING

- 3.1 In respect of cycle parking the proposed garage dimensions at 6m x 3m are in accordance with the WSCC 'Guidance for Parking in New Residential Developments'; as such they are large enough to provide for both car and cycle parking spaces. Secure sheds / storage is to be provided in the rear gardens of houses without garages.
- 3.2 Dedicated cycle storage is proposed in the flat blocks, enough to accommodate a minimum of 0.5 cycle spaces per flat as per the WSCC standards, thus Units 56-63 and 67-74 will have storage for a minimum of four spaces each, whilst Units 93-98 will have storage for a minimum of three spaces.

APPENDIX A

West Sussex County Council Parking Calculator

WEST SUSSEX COUNTY COUNCIL CAR OWNERSHIP PARKING DEMAND TOOL	
This parking demand tool has been compiled by West Sussex County Council. If you have queries relating to the information provided or require additional information please contact darryl.hemmings@westsussex.gov.uk.	
Please input the ward name for your development location below by double clicking in the box or click box and use the drop down menu to the right of the box. The spreadsheet will automatically show the District and Ward of this location. If the ward is not known please input postcode into the Ward Finder. The tool will allow input up to 3 wards in the boxes below. Please refer to notes for more details.	
Ward 1	Yapton
District	Arun
Ward 2	Barnham
District	Arun
Ward 3	Walberton
District	Arun
Ward Tempro Factor 2009-2026	1.050624
District Tempro Factor 2009-2026	1.067644

council

Ward Finder

Postcode		Ward	
----------	--	------	--

Note:

No special provision need be made for visitors where at least half of the total parking provision associated with a development is unallocated. In other circumstances, it may be appropriate to allow for additional demand for visitor parking of up to 0.2 spaces per dwelling.

In areas of parking constraint, levels of provision below predicted demand may be applicable.

The tool is expressed as number of Rooms (Per Unit). If data is not available in this format and number of Bedrooms is used this will need to be converted. A general guide for conversion is as follows but may differ in some cases.

Houses	Flats
1 bed = 3 rooms	Studio = 1 room
2 bed = 4 rooms	1 bed = 2 rooms
3 bed = 5 rooms	2 bed = 3 rooms
4 bed = 6 rooms	3 bed = 4 rooms
5 bed = 7 rooms	4 bed = 5 rooms

Garages will count as 1 space when allocating spaces.

Ward data used can be checked by the user by referring to the District-Ward Data Tables. The Ward Data Tables highlight if the Census data does not include data for certain dwelling sizes. In such cases car ownership values have been obtained using the nearest sized dwelling with same tenure and ward. For example, if no data is available for a private house with 1 room then data for a private house with 2 rooms has been used. The Car Ownership Data is highlighted in purple where such an approach has been used. Where Census data contains small samples for certain sized dwellings this is highlighted in red if <20, and green if <50 in the Total Demand column. In such cases, other wards should be selected to achieve a higher sample size.

Report Summary Table
