Subject: RE: Y/98/18/RES and Y/97/18/DOC

Dear Simon,

Thank you for your email regarding the lighting columns. The exact lighting column and lamp are detailed below:

Column Type

Columns to be 6 metre galvanized tubular steel straight shaft (no outreach bracket), Alclad coated, colour 12C39, Sherwood Green.

Lantern Type

Philips Micro Lama 5.15 with 6 LEDs complete with DALI dimming ballast fitted with Mayflower six pin NEMA socket, post-top mounted, tilt 5 degrees. Optic DM13, DW50, DM30 (with BL1 shielded option where listed) have been used for the lanterns on the roads.

Lanterns to be finished in light grey (Standard Philips light Grey).

Every lighting scheme is required to install one Mayflower Complete Lighting Control DALI Sub-master unit to control Nodes and link to Central Management System

We trust this now satisfies all your concerns. Our client agrees to an extension of time until 22nd August 2019.

Please note I am on leave tomorrow and Friday so please liaise with Zoe in my absence.

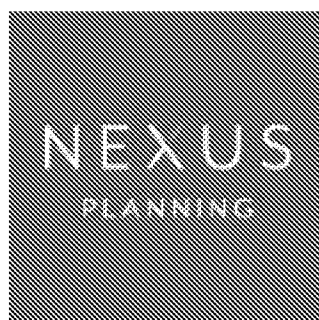

Kind regards

Kathryn

Dear Kathryn,

I recall that I rang you a while ago about the lighting scheme after I had received an objection from a Park Drive resident re light spillage. I know you have shown two additional trees to this boundary but I recall that you were going to provide me with the lighting spec so I could say whether it will include directional shielding or not. Are you able to provide this to me?

Kind Regards
