-  Japanese knotweed RICS 7m buffer
-  Root Barrier

SURVEY DATA: Invasive Non Native Species

Japanese knotweed (*Reynoutria japonica**) identified in multiple locations on site (September 2018) and removed in 2019. Note two areas remain outside of the development area that will be managed via herbicide treatment.

Note the red boundary defines the land ownership.

* *Reynoutria japonica* is the currently accepted name of *Fallopia japonica*.

Drawing Scale @ A3 = 1:1500

Data collected: OSTN02+OSGM02, ETRS89

Map Projection: OSGB36 (EPSG:27700)

Prepared 8th May 2019: Bovis Homes Southern Counties

Basemap = Amasia Architects Ltd, Illustrative Masterplan
 AAL-15-184-P01
