Dear Mr Davies

Following on from my telephone call to the Planning Dept today (17th June) My Husband & myself have some concerns regarding drainage & Surface Water on this building site, We understand that planning is still undecided, but we would like to know whether any plans to drain and improve drainage & to the ditch that backs on to our garden have been put in place. Bearing in mind that our plot seems to be so much lower than the new site, you may understand our concerns. We would welcome a site visit to us.

Yours Sincerely
