

This architectural elevation drawing shows a two-story house with a gabled roof. The exterior walls are finished with brickwork. The ground floor features two large windows with decorative lintels and sills, and a central entrance with a small gabled porch supported by two columns. The second floor has four windows, including two smaller square windows in the center. The roof is covered in shingles, and the drawing includes shadows to indicate depth.

This is a detailed architectural elevation drawing of a brick house. The house features a steep gabled roof with a wide overhang. The entire exterior is clad in brick. A chimney is located on the left side of the house. The drawing shows the front facade, including the roofline, gable end, and side wall. The brickwork is rendered with fine lines to show individual bricks and mortar joints. The house appears to be a two-story structure, with a horizontal line indicating the level of the first floor. The drawing is a black and white line art, typical of architectural blueprints or technical illustrations.

This is a detailed architectural elevation drawing of a brick house. The house features a steep gabled roof with a central ridge. The walls are constructed of brick, with a horizontal band of bricks running across the middle. A chimney is visible on the right side of the house. The drawing is a black and white line art representation.

A 3D perspective rendering of a two-story brick house. The house features a gabled roof with a wide overhang. The exterior is made of light-colored bricks. On the ground floor, there are two front doors, each with a small gabled awning supported by brackets. To the left of the first door is a large window, and to the right of the second door is another large window. The second floor has four windows: two small square windows on the left and two larger rectangular windows on the right. The house is set on a flat surface, and a shadow is cast to the right.
