Subject: RE: Planning Consultation on: Y/98/20/PL

Application No: Y/98/20/PL
Site Address: Bonhams Field Main Road Yapton BN18 0DX
Description of Works: Erection of 75 No. dwellings with associated parking, public open space & the creation of a new vehicular access. This application affects the character & appearance of the Main Road/Church Road Conservation Area & affects the setting of listed buildings.

Bats

The hedgerows on site are used by bats for commuting and foraging and will need to be retained and enhanced for bats. This will include having a buffer strip around the hedgerows (5m) and during construction fencing should be used to ensure this area is undisturbed. Any gaps should also be filled in using native hedge species to improve connectivity. Conditions should be used to ensure this.

The lighting scheme for the site will need to take into consideration the presence of bats in the local area and the scheme should minimise potential impacts to any bats using the trees, hedgerows and buildings by avoiding unnecessary artificial light spill through the use of directional light sources and shielding.

Dormice

The hedgerows on site are potentially used by dormice for nesting and foraging and will need to be retained and enhanced for dormice. This will include having a buffer strip around the hedgerows (5m) and during construction fencing should be used to ensure this area is undisturbed. Any gaps should also be filled in using native hedge species to improve connectivity. Conditions should be used to ensure this.

Badgers

Prior to start on site a badger survey should be undertaken to ensure badgers are not using the site. If a badger sett is found onsite, Natural England should be consulted and a mitigation strategy produced.

Foxes

Following submission of the Ecology Update Survey and Mitigation Strategy (Sept 2020) we are happy that the mitigation proposed would be suitable

Hedgehogs

As detailed within the Ecology Update Survey and Mitigation Strategy (Sept 2020) precautions should be put in place for hedgehogs and the site will need to be searched carefully before works begin. If any small mammals including hedgehogs are found they should be relocated away from the construction area into surrounding suitable habitats.

Reptiles

Following submission of the Ecology Update Survey and Mitigation Strategy (Sept 2020), we are happy that the mitigation proposed would be suitable. A condition should be used to ensure this takes place.

Nesting Birds

Any works to the trees or vegetation clearance on the site should only be undertaken outside of the bird breeding season which takes place between 1st March – 1st October. If works are required within this time an ecologist will need to check the site before any works take place (within 24 hours of any work).

Policy ENV DM5

In line with Policy ENV DM5 of the Arun District Local Plan information on Biodiversity Net Gain needs to be provided as part of the planning application prior to determination. We are satisfied that the biodiversity enhancements recommended within the Ecology Update Survey and Mitigation Strategy (Sept 2020) are suitable and should be incorporated into the landscaping scheme. A condition should be used to ensure this takes place.

Kind regards

Liz
